## AUTHOR'S NOTE

There's a story behind **The Comix Section** but I'm not going to write about it yet. This first issue has had some ups and downs as far as coming together and I've either been injured or having something medical going on the entire time. And the story behind it requires some thought, which isn't to say this author's note won't have some thought, but I cannot promise editing.

Instead, I'll be talking—briefly, I assume—about why **Comix Section** isn't just a series of posts on **The Stop Button**, or some relaunch of **Comics Fondle** or even a launch of something called **Comix Section**. Why is it a PDF zine? Why is it a PDF zine weighing in at approximately 1.2 GB?

Sorry, I didn't know size. I still don't since this note goes in the "front cover."

**CS** is a zine because I wanted to drop it all at once. Or, all at once, while in distinct pieces. This volume of **Comix Section** has twenty-seven issues, which may take as long as five months to get out the door. I was shooting for three months to be quarterly, but we shall see. **Comix Section** is happening amid a lot, which has stayed rather outside because I've been doing this type of writing for twenty years.

That anniversary is ironic (I'm pretty sure, I'm not checking), but I'm not talking about why yet. Because I'd have to think about it, and I'm feeling very much like Gene Evans in **Park Row** in terms of going to press. Meaning, unlike the contents of this zine, I'm not proofing this note.

## NOTES ON FORMATTING

**The Comix Section's** ideal reading format is a saddle-stitched flip zine. Saddle-stitching is beyond my current technology, but I'm going to try with a stapler tomorrow.

It should be read in color, obviously. The art's in color, it should be read in color.

There are four flavors of **CS #1**. **First version:** 1 and Side 2 in order, with Side 2's cover coming in the (approximate) middle of the PDF. **Second version:** Side 2 to Side 1, for those who love icky seventies writing. Or love to read someone talk smack about icky seventies writing. **Third version:** Side 1 and Side 2 separate.

Versions 1-3 are available in uncompressed (as much as it can be) PDF and CBZ, then a compressed PDF and CBZ. So many options.

**Fourth version** is a printable, color PDF. I'm exploring a black and white PDF, but the images convert something awful and they need to look better without color in print.

Though, like I said, I don't know yet how it prints in color either.

All versions are available for download at <https://thestopbutton.com/cs>.

## “THE ORIGIN OF THE SPIRIT”

June 2, 1940

Will Eisner (editor, script, pencils, inks)  
Joe Kubert (colors)  
Zoltan Szenics (letters)

**The Spirit** ends his first adventure leaving three burning questions unanswered. First, why is he remaining officially dead—we’ll loop back—second, why doesn’t he think everyone will recognize his blue suit, and, third, how does he have those little tombstone calling cards carved already.

The strip—**Spirit** dropped as a weekly newspaper special—has thirties illustration sensibilities, almost PG-13 dialogue (as newspaper audiences include more teens and adults than a regular comic book), and sublime

stage direction. Eisner doesn’t waste any panels, big or small (the Spirit’s resurrection is in extreme long shot in a small panel), but also saves some composition wows for the third act. Sure, Spirit is fighting escaped criminally insane Eastern European mad scientists with racist caricature henchmen, but the visuals of the showdown are pure noir (Technicolor noir?) fisticuffs. It’s hard boiled hero stuff, even as the Spirit—despite being in it, at this point, for the money and not having to pay taxes—is a bit of a lug, especially for a vigilante.

This first strip introduces the Spirit (Denny Colt before death, just “The Spirit” after), police commissioner Dolan (who knows the Spirit’s identity and approves of that plan to be a vigilante), and, in a one panel cameo, Spirit’s future sidekick, Ebony White. Ebony’s a cabbie; he doesn’t get a name here. Ebony’s a young Black man. The caricature is horrific. The villain—Dr. Cobra—has the Asian bruiser sidekick and it’s a bit. Ebony’s a lot.

And it’s just a panel (albeit observed with foreknowledge). But imagine how big a panel on the newsprint. **Spirit’s** greatest boon—being read with more potential detail—also can spotlight its unfortunates.

Bad, worse, good, mid, sublime, inspired, and genius—**The Spirit** has them all. Eisner (and his studio) deliver a visually compelling, narratively engaging comic spectacle. The exposition ranges from flat to purple, but the movement—and the movement’s framing—is truly exceptional work.

Even if the exposition doesn’t help, there are smarts to the plotting. For example, the two best visual sequences are Spirit’s showdowns with Cobra. He’s either had a jovial or moody setup

"THE RETURN OF DR. COBRA" (JUNE 9, 1940), PAGE 4  
WILL EISNER'S THE SPIRIT ARCHIVES, VOL. 1 (DC COMICS, 2000).

for the showdown, then Eisner delivers the action goods. Vats of chemicals, henchmen, escape boats in the backgrounds and foregrounds, big and small parts of the action, and full of deeper implication. It's mood implication, though, not expository.

Anyway.

**The Spirit's** off to a great start. Just hold onto your (blue) hat on the proverbial cab ride.

## "THE RETURN OF DR. COBRA"

June 9, 1940

Will Eisner (editor, script, pencils, inks)

Joe Kubert (colors)

Zoltan Szenics (letters)

The strip opens with Spirit dropping into Ebony's cab. Literally, from a tree. Spirit then pulls a gun on Ebony, demanding a ride to town, while the passengers—Homer Creap and Ellen Dolan—sit terrified.

Ellen's in town to visit her dad, the regular cast member Commissioner Dolan, and to introduce him to her fiancé, Homer.

Homer Creap.

They're both nerds in glasses and Homer's got buck teeth. Eisner's not being subtle for the cheap seats. Is it worse than Ebony? No. Even with discovering the Easter egg of unconscious Ellen's side boob at some point, no, still not worse than Ebony in his handful of panels.

Ellen's also going to help returning villain Dr. Cobra escape because she's got book smarts not street smarts. She's a psychology major and Dolan lets her tour the ward. Cobra knows a

couple marks when he sees them and convinces them to help him get out. He then takes them hostage, which sets Spirit on his trail.

We get Spirit's tombstone calling cards again. While the cops do big action sequences in small, beautiful panels, Spirit goes undercover on the street and passes them out. The cards say he's going to kill Dr. Cobra at midnight.

Action cuts to Dr. Cobra's at midnight, Spirit shows up to kick ass. At that point the strip becomes a glorious chase sequence through the city, with Cobra and Spirit pausing occasionally for a beautifully rendered action beat.

After that creative high, the strip needs to bring things back down to Earth for the finale, which has Spirit taking off Ellen's "ugly" glasses, letting her hair down, and revealing her to be a hot

chick. He and Homer then fight over who gets to kiss her first (Spirit as reward for saving her, Homer with the buck teeth because she's finally on that social capital level).

Might not have been the best time to be a lady. Just saying. Because, remember, this one's in the newspaper so the target readership includes the ladies.

If you can subtract the 1940, it's sublime. And—shudder—the 1940... could be worse.

“THE BLACK QUEEN”  
June 16, 1940

Will Eisner (editor, script, pencils, inks)  
Joe Kubert (colors)  
Zoltan Szenics (letters)

The first panel sets up everything in the strip (save formal cast additions)—mobster Grogan on trial for murder, defended by “The Black Queen,” his lawyer, and a side item about the school district running out of money for lunches.

Grogan gets off (with implications of a fixed jury), and Spirit drops by to ask him for a donation to the school lunches. Now, Spirit has just interrupted Grogan and Black Queen talking business... she's more than his lawyer, it's her mob and he's her proxy. Spirit either just missed that disclosure upon sneaking in, or he was too distracted, or he didn't think it warranted comment.

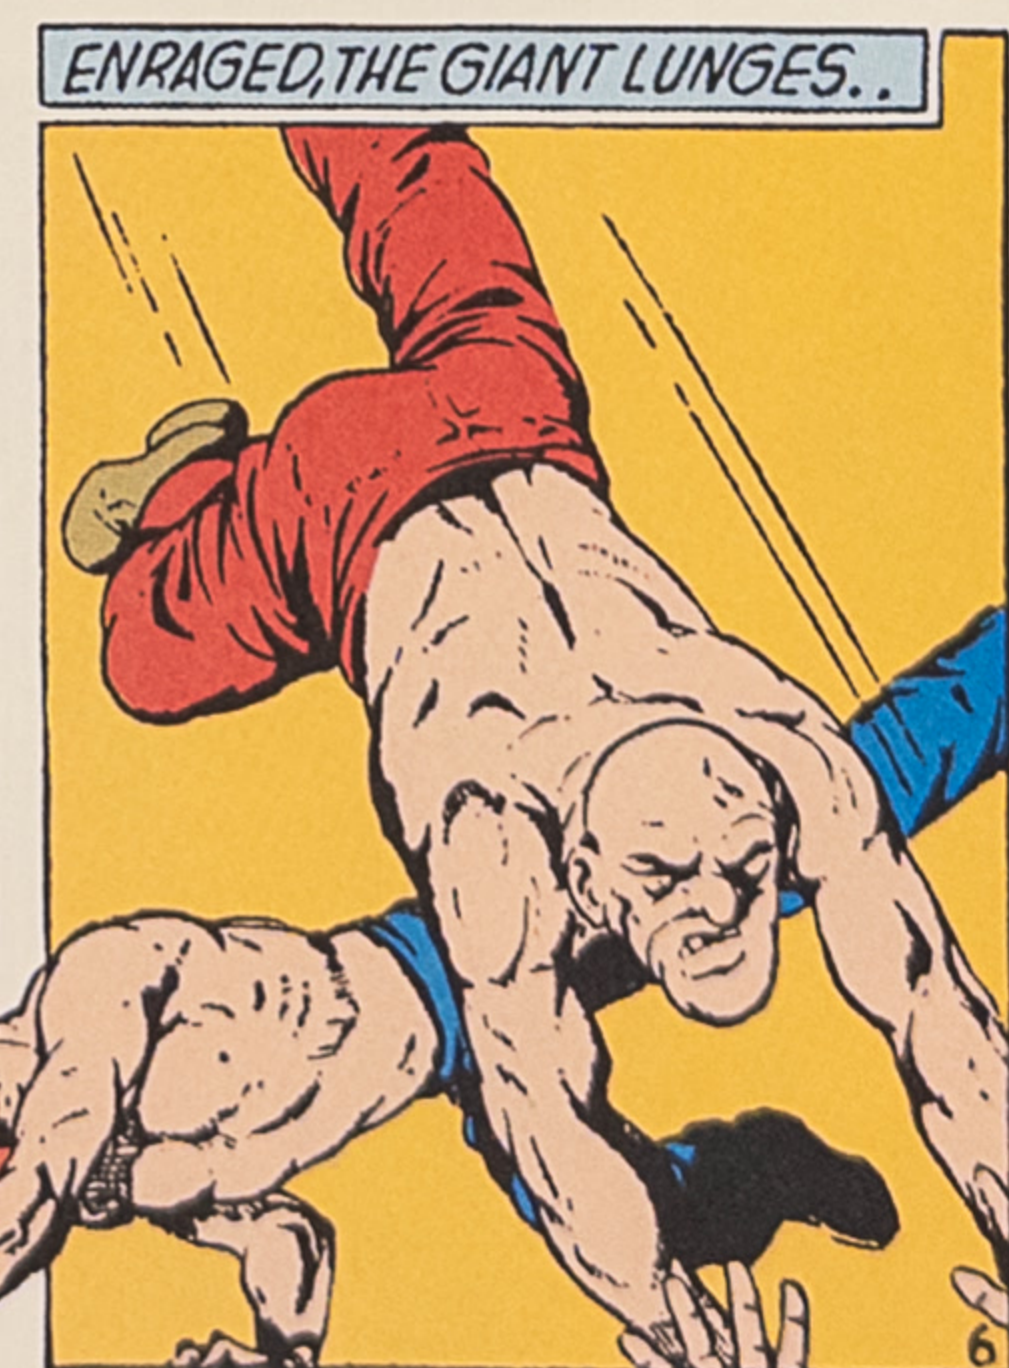

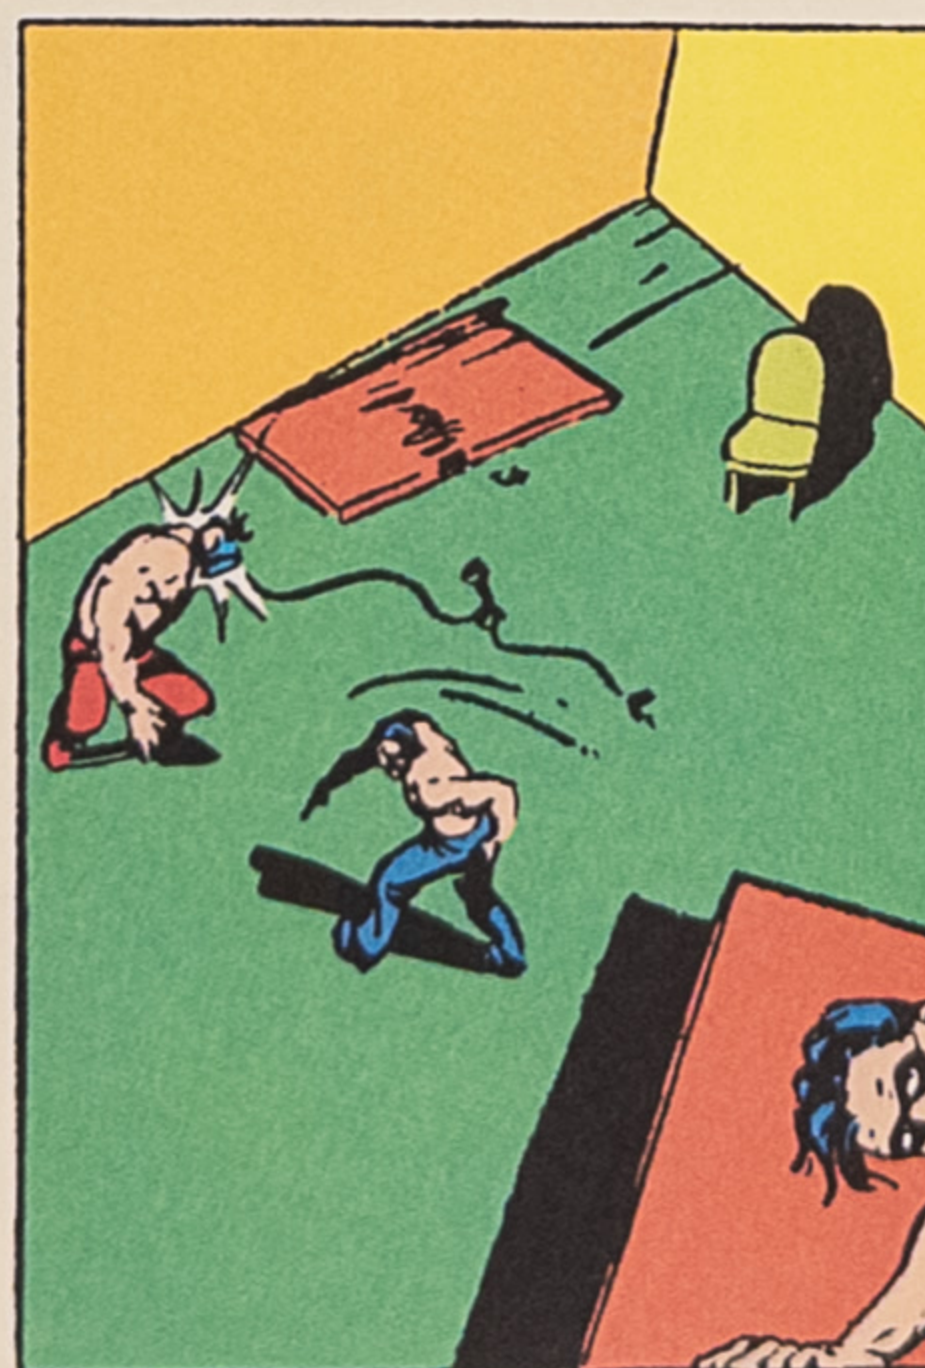

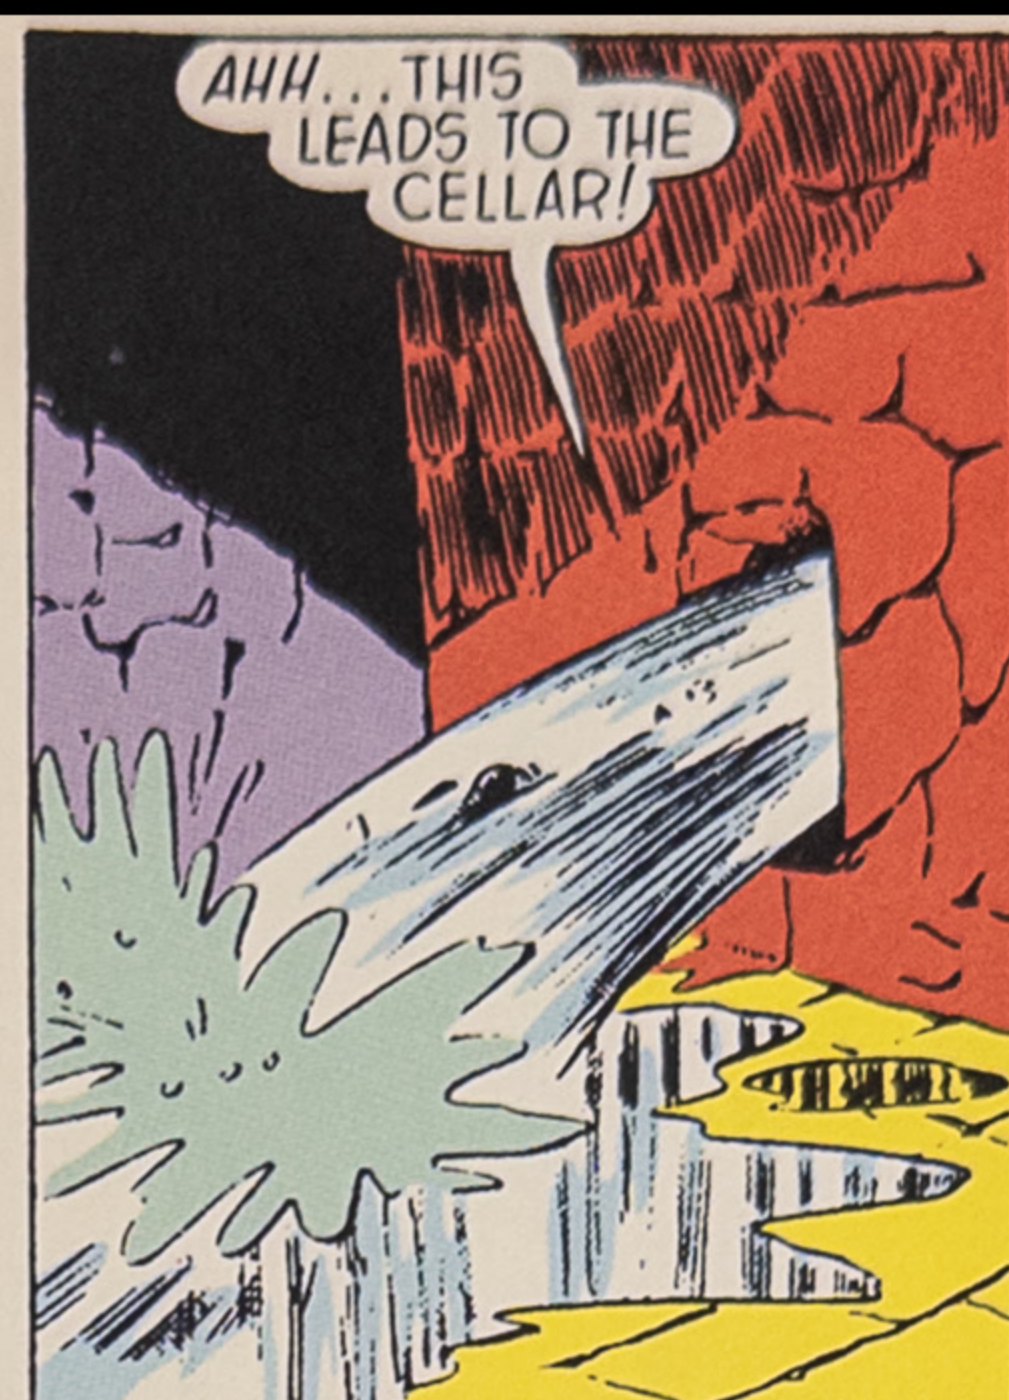

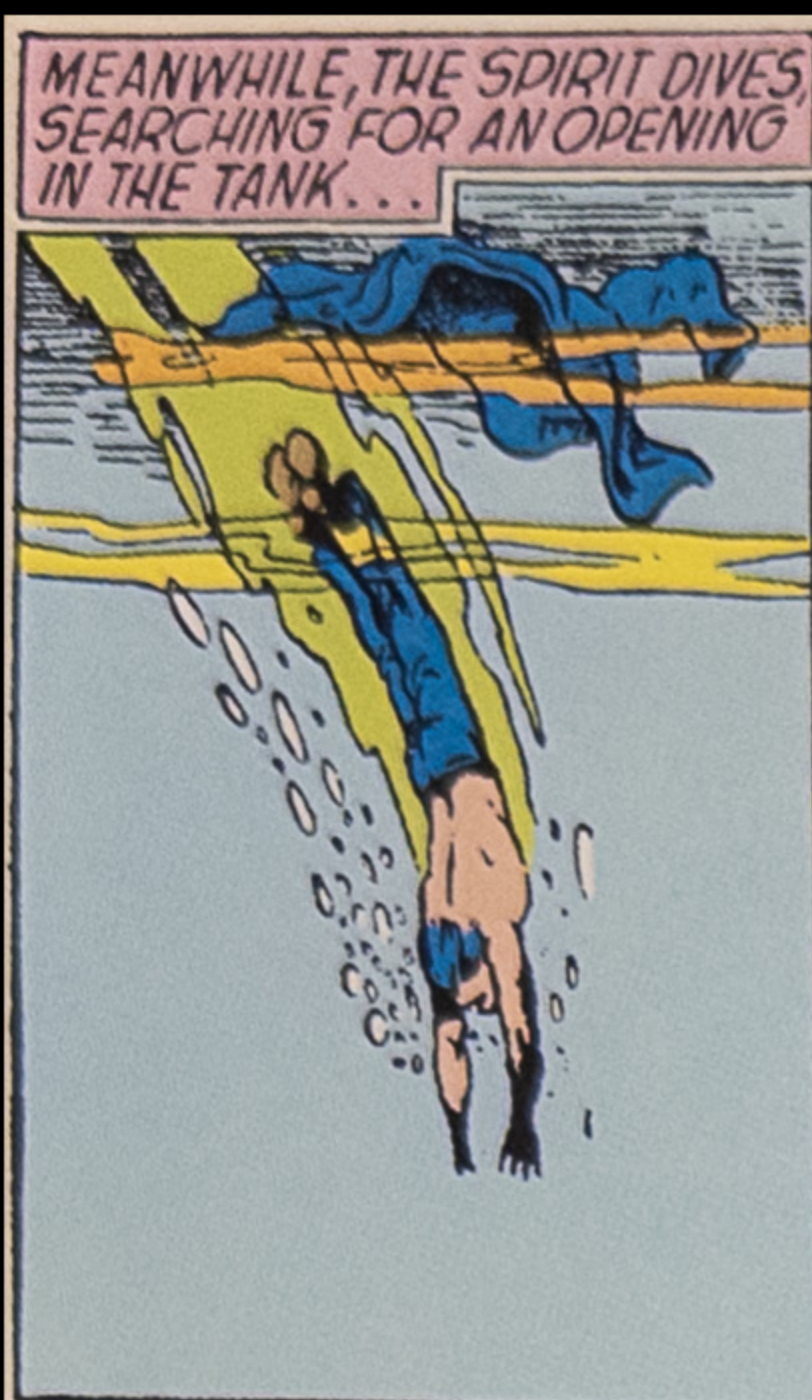

He will go out of his way to get a look at Black Queen in her undergarments because the strip's got a lot of implied misogyny. Can't trust dame lawyers.

Also, let's get this one done, too—Ebony gets his full name and hired on as Spirit's sidekick. His assignment goes from being a cabbie to holding a gun on the coroner, the district attorney, Grogan, and Black Queen. For a criminologist, Spirit has a profoundly confusing understanding of the criminal justice system. Perhaps they're in a universe without double jeopardy, in which case Spirit's plan isn't to torture and extort Grogan, or they are in a universe with double jeopardy and it is Spirit's plan to torture and extort him.

It's strange either way, and the action all seems toned down. Lots of longer scenes to get out dialogue, normal length chase scenes. There's still some lovely composition, but it plays like the opening newspaper headings exposition device is the strip's most significant success and,

upon making the hit, Eisner and studio coasted a bit.

The last panel has Spirit and Ebony heading to the Wildwood Cemetery—where Denny Colt was buried in the first strip and Spirit’s been hiding out since (doesn’t he miss plumbing?)—and the moment’s from Ebony’s perspective. They have a little banter and... well, the Spirit’s a weird dude.

Maybe on purpose, maybe not. Even as the dialogue and exposition improve this strip—Eisner (or whoever) realized the art doesn’t need a lot of words slowing it down—the Spirit gets a little more distant. Eisner hasn’t decided how to position the reader with the Spirit yet. This strip tries some things, but doesn’t have room to evaluate them.

Maybe next time.

“VOODOO IN MANHATTAN”

June 23, 1940

Will Eisner (editor, script, pencils, inks)  
Joe Kubert (colors)  
Sam Rosen (letters)

The strip opens with Ebony and a lodge brother in Wildwood Cemetery looking for the Spirit. They find him, appearing out of smoke, and request his assistance--their lodge building seems to be haunted, can Spirit investigate? After some whinging, the Spirit agrees. The scene reveals some of the Spirit’s setup at his underground crypt lair. Just stairs and a chemical lab, but it’s something.

The Spirit misses the lodge meeting and arrives afterwards so he can investigate without anyone around. The lodge meeting—a secret society supporting Black orphans, which makes no sense—isn’t great—lots of racist caricatures.

The Spirit showing up to investigate works much better, even with the panels leading up to it. He spirits (no pun) Ebony away from a lodge brother, which leads to a “running away” gag. Eisner and studio open with scary cemetery stuff, move into “comedy” with lodge meeting, and then into an action strip.

It doesn’t take much investigating for the Spirit to uncover the culprits. Spirit’s got to punch his way out of a couple tough situations, finding the Harlem mansion full of secret rooms and underground water tanks.

The water tank’s especially important because we get the Spirit out of his shirt for the last few pages of the strip, showcasing the beefcake

(which, it turns out, is a very cold way to go around).

The exposition is a little purpler than last time; it's mostly for mood and works. The action is pretty contained, some fisticuffs, breaking through walls and floors in the mansion, plus the water tank sequence.

The resolution with the villain leaves some questions unanswered. Spirit has his theory of the case, and nothing exactly contradicts him, but because it's so rushed, motive questions go unanswered.

Given the constraints of setting and scope, the strip does an excellent job showing how **The Spirit** can do big things in a small story.

## "JOHNNY MARSTON"

June 30, 1940

Will Eisner (editor, script, pencils, inks)  
Joe Kubert (colors)  
Sam Rosen (letters)

*Johnny Marston's* splash panel has a short blurb explaining the Spirit's origin—of note because it's a strip standard from now on. It's also the first strip where the Spirit stumbles into an ongoing adventure.

Johnny Marston is a blue-blood fallen on hard times. Dad gambled away all the money, now Johnny's wife is deathly ill and he can't afford to get her out west, where the dry air will save her. With their last thirty bucks (not even), he goes gambling. Successes don't turn out to matter because the gangster running the joint isn't going to let Johnny cash out.

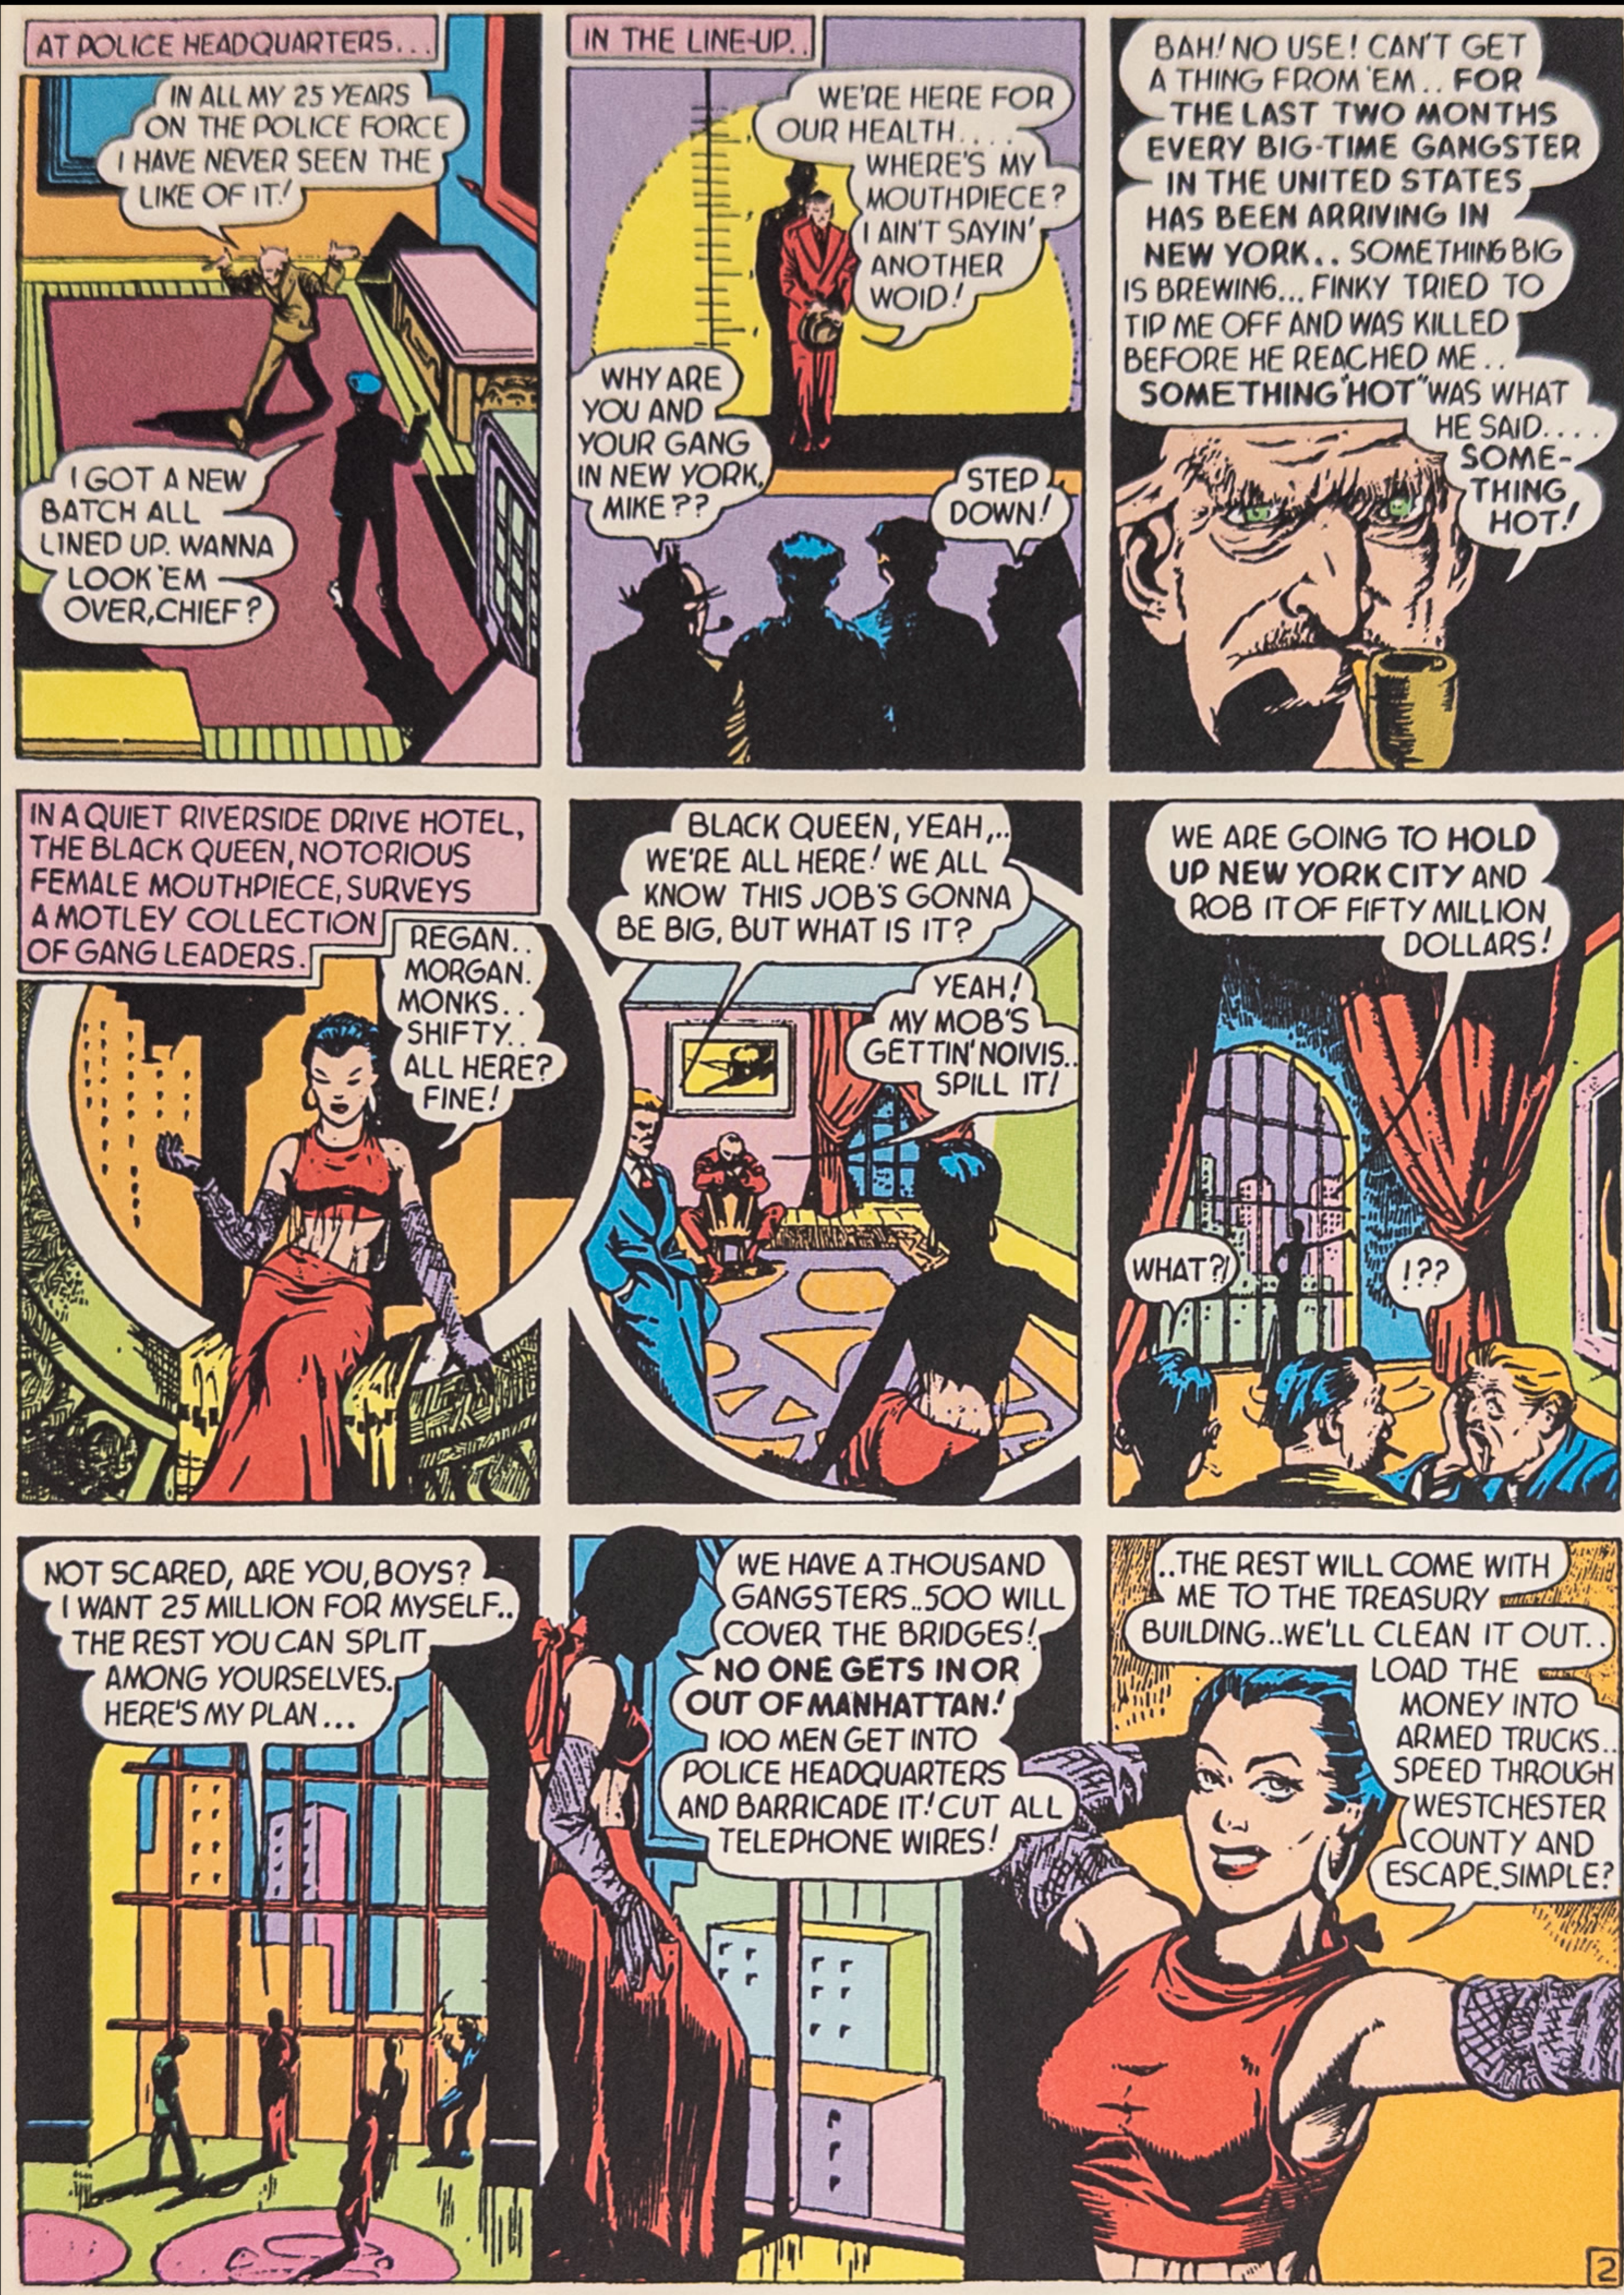

The gangster's muscle beats Johnny close to death and they dump the corpse-to-be in Wildwood Cemetery. Luckily, the Spirit happens to be on a walk when he sees the body being dumped and can gather enough information to try to take down the gambling establishments. Ever opaque about the Spirit's actual skills, Eisner and studio do not explain how someone can have a whirlwind night at the casinos without ever losing. Maybe it's the Spirit's blue top hat, which he dons for the outing.

There's some great art. Not much in the way of fisticuffs, with gambling antics and a big car chase sequence providing the action this time around. There are still some fisticuffs, of course, but not only fisticuffs. The panel layouts with the Spirit getting interested in taking down the

Eisner and studio tell one heck of a full story in these eight pages. The splash panel gives the Spirit origin and shows Wildwood Cemetery very close to New York City proper, with an airplane below the cemetery. But the story of *The Black Queen’s Army* begins with a stool pigeon getting shot dead and the cops unable to make an arrest. Even though gangsters from all over the country have been coming to Manhattan, no one can figure out what they’ve got planned.

Well, they’re going to rob the Federal Reserve Bank (or something) of a million dollars in gold bullion. And they’re doing it for that notorious female mouthpiece *The Black Queen*. Since her last appearance, she’s gone full Bond villain—note, the Spirit should’ve known she was the gangland mastermind but missed that one—and has a straightforward plan. Block the bridges, take the police headquarters hostage, and parachute hundreds of gangsters with Tommy guns into the city.

The visual execution of the mega-heist is sublime. Eisner doesn’t deal with the large-scale assault, instead zooms in on Commissioner Dolan’s losing fight for headquarters and the police radio’s message reaching the Spirit and Ebony. Also sublime this strip is the art. Eisner and the studio have gotten their line work down. They’re still a little sharp, but there are fewer of them and they’re doing more work. There’s some excellent detail in this one.

gambling dens and the car chase are particular standouts.

There’s also the Spirit getting mad at Dolan for the police department not coming through right, which is an interesting detail if a throwaway. And the last sequence, with a postal delivery person having to go to Wildwood Cemetery, is cute.

Outside the dumb luck factor—tying Johnny and the Spirit—being a tad slight (Eisner spends so much time on Johnny’s setup, he doesn’t have the space to tie them better), it’s a good strip. Sympathetic characters, determined Spirit, it works out.

And we get to see a little more of Spirit’s crypt lair. He’s at least got a bed down there.

• • •

Including—awkwardly as ever—on Ebony’s caricature features.

Ebony’s a full sidekick this strip but doesn’t get anything to do except give the Spirit a conversation partner. He doesn’t even appear as the third act action takes over—oh, forgot—Spirit is putting together his flying car this strip. Thanks to the car he can get to Manhattan to save the day. The flying car stuff is ridiculous, but the rendering of it is so gorgeous it doesn’t matter. Eisner’s packing this strip. Dolan gets whole kidnap and rescue scenes, Spirit takes out multiple bands of crooks; it’s a full-on action comic. And it’s fantastic.

Eisner showcases the strip’s ability to do exciting—all in eight pages—and it’s glorious.

## “MR. MIDNIGHT”

July 14, 1940

Will Eisner (editor, script, pencils, inks)  
Joe Kubert (colors)  
Sam Rosen (letters)

There’s a lack of consistency to *Mr. Midnight*. After a gorgeous splash page, featuring the dramatically posed new villain, with the intro text recapping the Spirit’s origin segueing naturally into the exposition’s start, the art seems to go from Eisner’s drafting table to someone else’s in the studio.

Many other someones, in fact. *Midnight* barely maintains style between panels, much less pages. The lines go from busy and erratic to clean to busy. There are some ingenious panels throughout, like when Spirit is facing off against Midnight and they’re both just little stick figures in the distance.

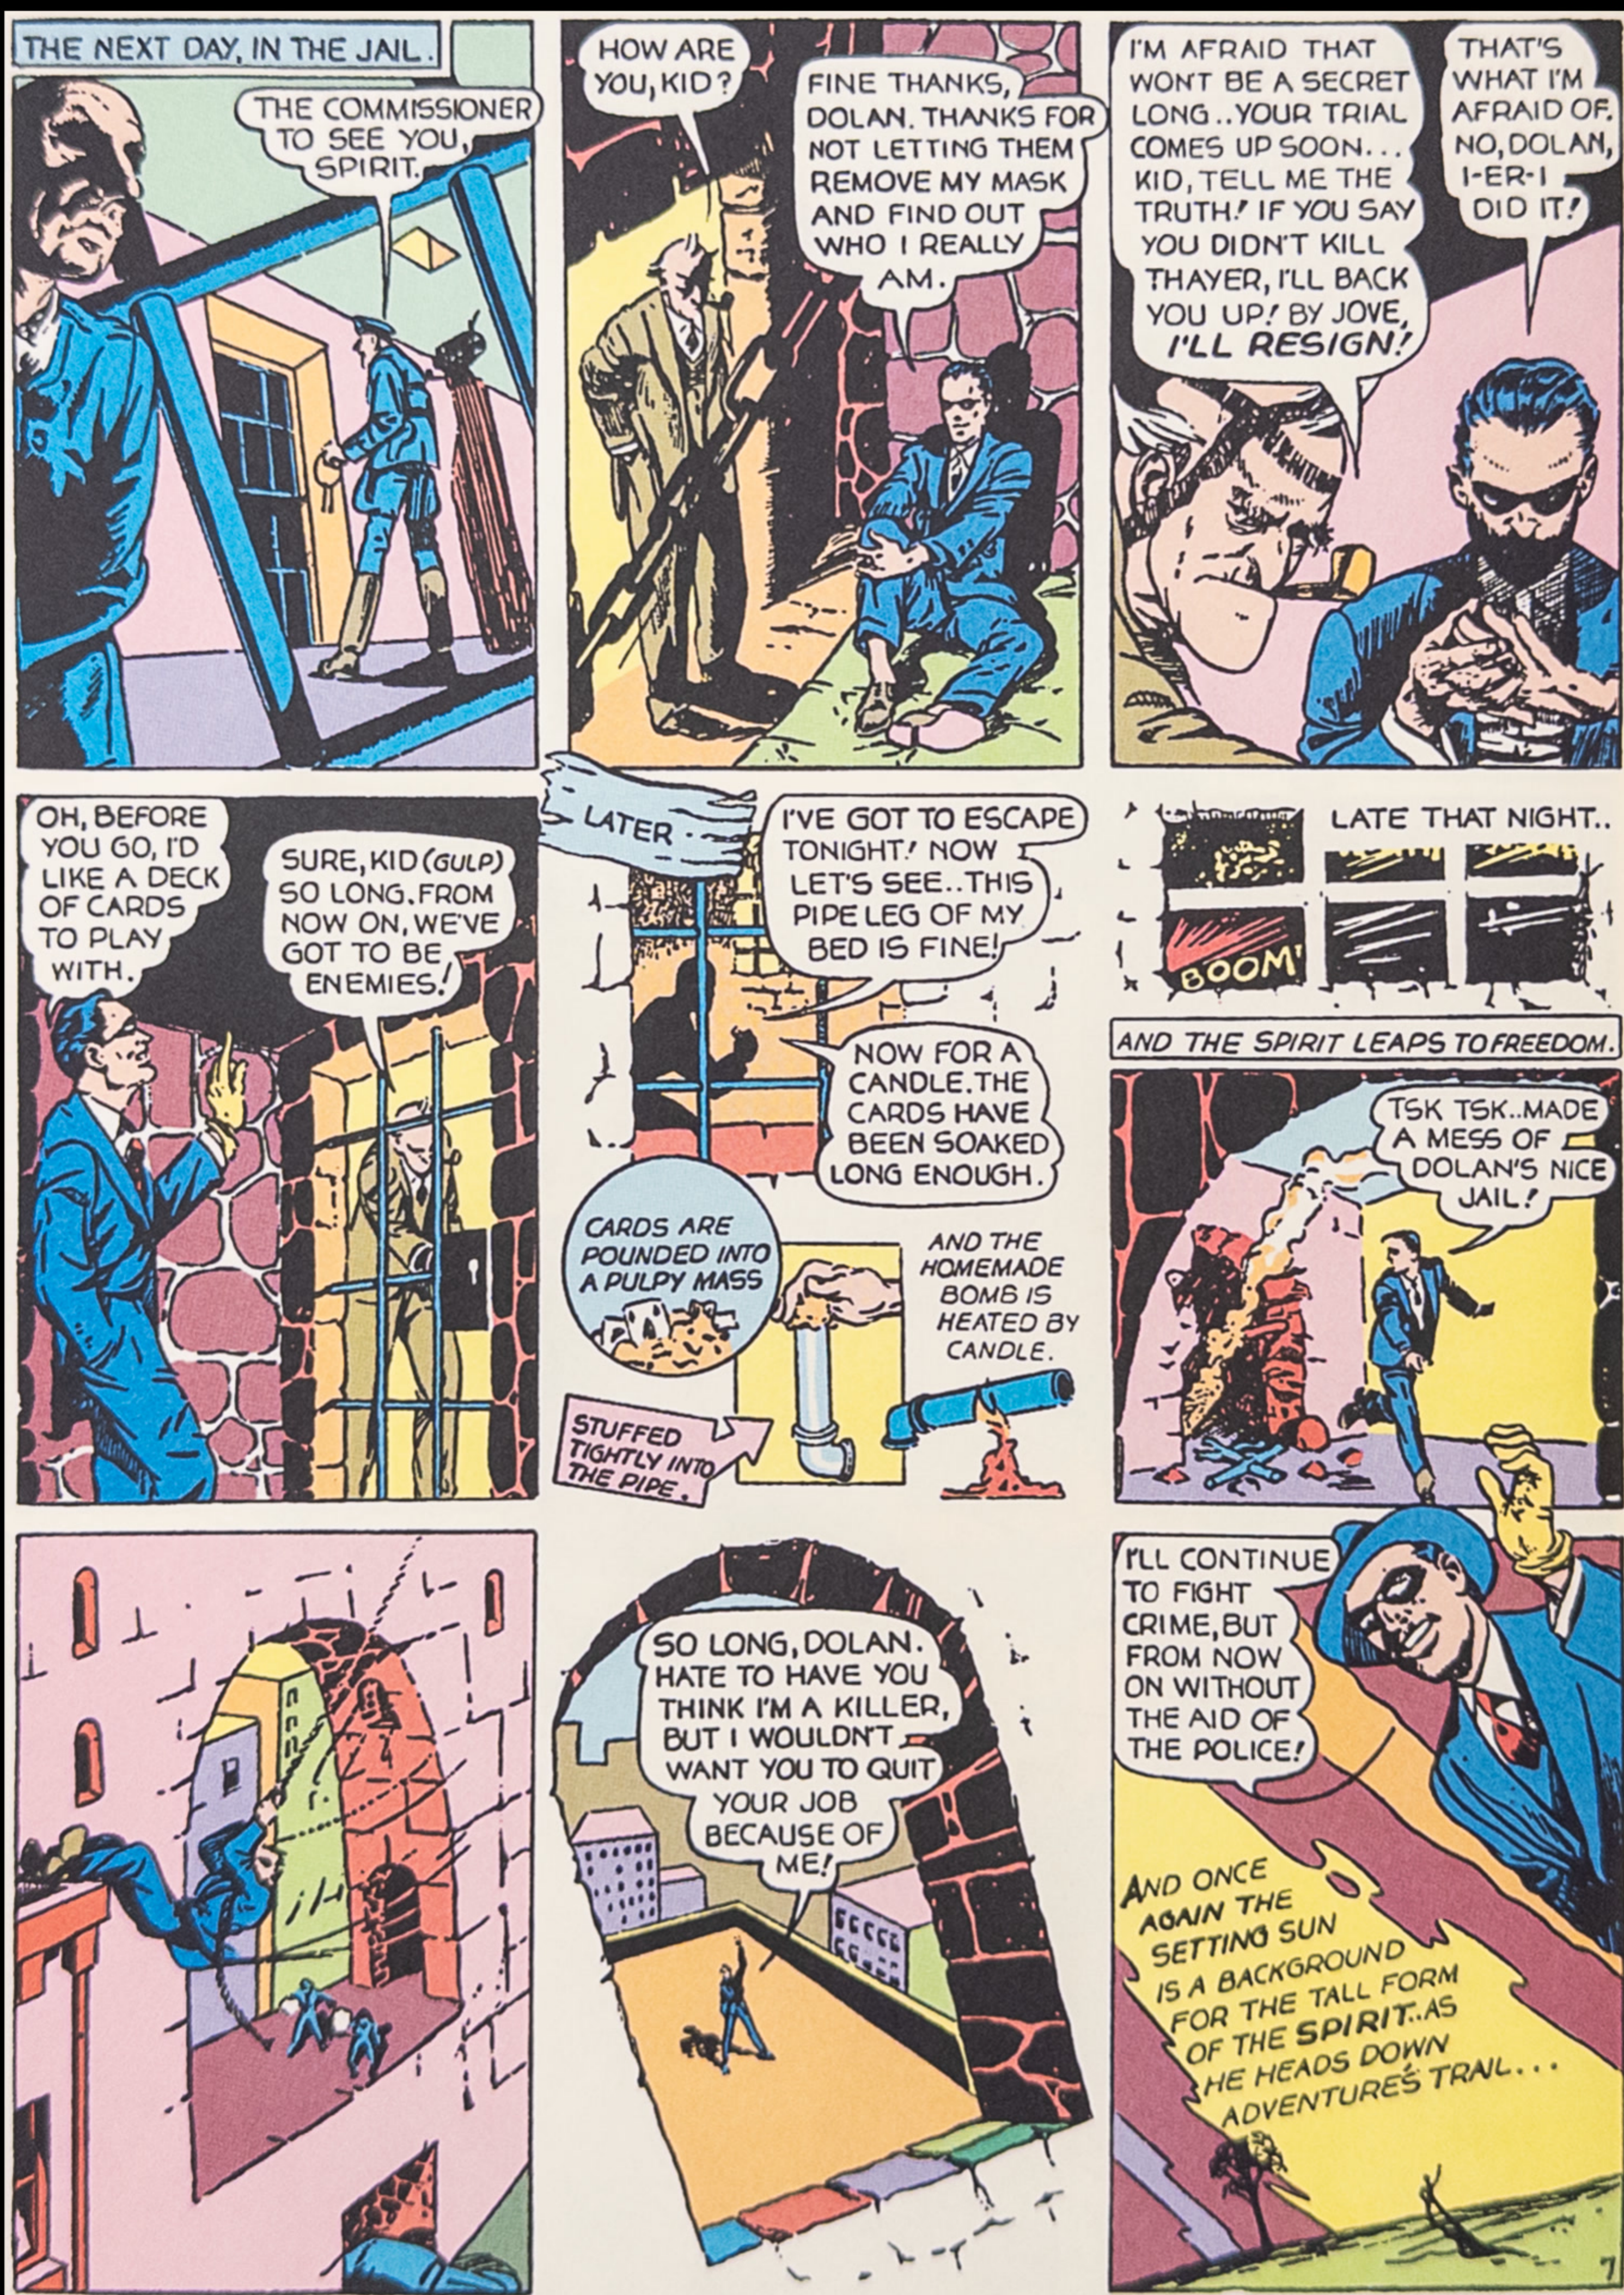

Even at its worst, the art only ever seems way too rushed, never bad enough to slow the pace of the story.

The story involves Mr. Midnight taunting the Spirit with a perfect crime. Midnight’s going to murder someone in front of Spirit and Commissioner Dolan and they’re going to let him go. I could also mention here Mr. Midnight is Smurf blue, which is barely a plot point and seems like something just done for the visuals... or another of the seeming miscommunications between writers and artists—pin in that one.

Eisner ratchets the suspense during this sequence, having Dolan, Spirit, and Midnight having to wait around for Midnight’s victim to arrive. So there are two full story beats before Spirit even has anything to do on his own. And even when does something, it’s not a lot. He just

follows Mr. Midnight home, and, thanks to his autoplane, gets there before Midnight.

Some villain monologuing and sinister chess playing ensue; it'll eventually get around to fisticuffs and high action.

Eisner (and Spirit) save the mystery resolution for the last few panels after the action has been resolved. It's an engaging ride, even if Midnight's not a good villain (he's just Smurf blue), and Spirit and Dolan kind of let him kill that guy in the first scene. They sure didn't try to stop him.

And that sequence—with Midnight taunting everyone before (ostensibly) committing a murder—is where the strip gets confused on details. The script says there should've been a visual tell, but there's no visual tell when you go back.

It's an odd, uneven, entertaining outing. And that gorgeous splash page is gorgeous.

## “ELDAS THAYER”

July 21, 1940

Will Eisner (editor, script, pencils, inks)

Joe Kubert (colors)

Sam Rosen (letters)

*Eldas Thayer* is the name of a miserly old rich guy who's refusing to pay for his niece's medical treatment. Thayer's doctor has just given him the bad news—he's got a day to live. The Spirit shows up just after, pleading for the niece's life. Thayer doesn't appreciate the Spirit's tone, especially since Spirit heard the doctor's report.

“No,” says Thayer. “I'd kill you,” says Spirit, “but morale code blah blah.”

Thayer then concocts a Rube Goldberg contraption to kill himself and blame Spirit because screw that guy. Thayer's not just a bad guy, he's visually unpleasant. *Thayer* will have some fantastic action sequences, strip-best dialogue, and—I believe—the first significant Spirit character development. But the art's rough at open. Dots instead of lines. So Thayer's, like, repugnant in his close-up.

He successfully frames Spirit for his murder, Spirit goes to visit Commissioner Dolan, unaware he's wanted for murder, the mayor just happens to be there, tells Dolan to arrest Spirit, Dolan pleads with Spirit to proclaim innocence and Dolan'll quit the force for him to fight for truth.

Upon hearing his only confidante's pledge, Spirit decides he cannot deprive fair Gotham of

her police commissioner and says, “No, I killed him.”

So then begins the chase portion of the story, which—remember—is called *Eldas Thayer*--cops are after Spirit, Spirit is trying to save the dying niece. Thank goodness someone remembered her.

Panel after panel, there’s great art and brisk storytelling. The art’s never quite sublime in terms of line work (except the splash page), but the composition and the writing establish a beautiful rhythm. Tiny panels composed like classic Hollywood montage shots; the panels get downright exquisite for the last few pages. At nine panels a page. It’s some genuinely exceptional art this week.

And then the writing.

Having to deceive Dolan (for his own good) immediately opens up a whole new layer to Spirit. He’s gone from white knight to dark knight. I did check: Gordon did appear in *Detective* before **Spirit**... but, based on a cursory look, that work marriage wasn’t anywhere near this far along yet.

**Spirit** makes the move fearlessly, the Spirit announcing (addressed to Dolan but for the reader) they’ve got to break up so Spirit won’t drag him down. But don’t worry, if the forces of evil should rise again, to cast a shadow on the heart of the city, the Spirit will be there. Just as an outlaw.

It’s a gorgeous finish, too. Extreme long shots, clean lines, sublime composition.

Easy strip best to this point.

## “PALLYACHI, THE KILLER CLOWN”

July 28, 1940

Will Eisner (editor, script, pencils, inks)  
Joe Kubert (colors)  
Sam Rosen (letters)

Since the last strip, when the Spirit confessed to a murder he did not commit to save Commissioner Dolan’s reputation and career, he’s apparently been taking it easy. The strip opens with a gorgeous, gigantic splash of the title character--*Pallyachi*, introduced by a ringmaster as “a killer clown.”

We get Pallyachi’s story—he gets laughs at the circus, but Marka—the maybe belly dancer (it’s never established)—still won’t return his affections. Maybe if he’d kill for her she would,

starting with one of the trapeze acrobats. Palyachi's reluctant, but once he gets going with his criminal ways, he can't stop himself, going on a rampage around the city.

Despite the first panel after the splash establishing the circus is right near Spirit's hideout in Wildwood Cemetery, he and Ebony have no idea it's there. Days into Palyachi's crime spree (he's trying for a million bucks to sway Marka), Ebony brings a recent crime to Spirit's attention in the newspaper.

Spirit immediately deduces it involves a circus, and to their surprise, there's a circus out the window (of the crypt) they hadn't noticed for days on end. It's a little thin, even for a comic strip, but once Spirit gets to the circus—where Marka is going to literally strip down to seduce him, very risqué—it turns into an excellent action strip, and the occasional bumps don't matter.

The Spirit goes into the situation entirely clueless as to what he's uncovering and lets Marka convince him Palyachi's the mastermind. Well, maybe. Spirit definitely plays along with Marka (who gets naked waiting for Spirit to return after dealing with Palyachi), but when he starts suspecting her involvement isn't clear despite him finding her in possession of all the loot from Palyachi's heists.

The fight scene has the two running around a circus, including trapeze action, and even a killer gorilla. Lots of beautiful panels, with phenomenal flow, even as the inking is uneven. Someone in Eisner's studio still thought dots were going to win over lines.

The finale involves the police, who are after Spirit (the opening origin blurb even includes Spirit being an outlaw now) and don't care he's trying to solve a crime spree for him.

It's rather good, even with the occasional thin plotting, or, in the case of the ending, thin sentiment.

## "THE DEATH DOLLS"

August 4, 1940

Will Eisner (editor, script, pencils, inks)  
Joe Kubert (colors)  
Sam Rosen (letters)

While *The Death Dolls* do play a part, the most impressive element of this strip is the proto-Nazi killer robot. "Proto" because Eisner wasn't willing to be too explicit in 1940. But there will

be a robot shaped like a German soldier (the helmet is the giveaway) who tries to destroy New York.

But that raid is in the last couple pages....

The strip begins with the Spirit tracking evil munitions engineer Yagor to a small New England coast town. The overly verbose—but finding its charm—introductory exposition has the Spirit arriving by boat, giving the town an isolated vibe. The isolation is just to provide the moody setup. And possibly just some Spirit showing off with his motorboat pursuit.

He's tracked Yagor from the city, the obvious culprit in the murder of another weapons engineer. Yagor stole his plans to sell to a German guy. Again, the strip's not explicit—the guy just happens to be named Emil Kampf, but he could be representing any global superpower with a name like Emil Kampf in 1940.

Instead of just shooting the Spirit on the spot, Yagor lets Spirit douse him with some exposition about the murder case in the city, which involves Spirit catching wind of the deal with Kampf. So Spirit's going to hang around and watch the deal, thereby witnessing Yagor selling secrets to a foreign power, which is just good business when you think about it.

Except Kampf thinks the robot Nazi is a bad product (he shoots it a couple times, causing oil leaks), and storms out. Then Yagor unleashes the death doll, which tracks Kampf back to his hotel in New York City—walking across New England, which totally means Spirit could've driven—and detonates when it reaches Kampf.

Spirit tries to stop Yagor, but the robot is still functional and it kicks his ass. As Yagor and the

robot leave to start their reign of destruction on the world for refusing to buy his stolen arms (why was a U.S. company making robot Nazis... oh, never mind, **Spirit** takes place in a reality close to ours), he leaves a death doll to take care of Spirit.

Obviously, the Spirit will foil the doll, escape, and save the day. However, when the robot hits the city, it's fighting an army of cops, forecasting a fifties sci-fi monster gone amuck. Spirit concentrates on Yagor, and negotiating a temporary truce with Dolan.

It's another great strip, with a few pages of sublime lines, and a fun finish after some phenomenal action; the studio just can't unlearn the reliance on dotting for inking fast enough.

## “THE KIDNAPPING OF DAISY KAY”

August 11, 1940

Will Eisner (editor, script, pencils, inks)  
Joe Kubert (colors)  
Sam Rosen (letters)

*Daisy Kay's* kidnapping involves a lot more action than the setup will imply. The strip opens with Homer Creep (renamed from the previous, presumably French spelling, Creap) bursting into the Spirit's crypt lair with a pistol at the ready. Spirit handily disarms Homer and invites him into the lower portion of the lair—the living quarters and laboratories.

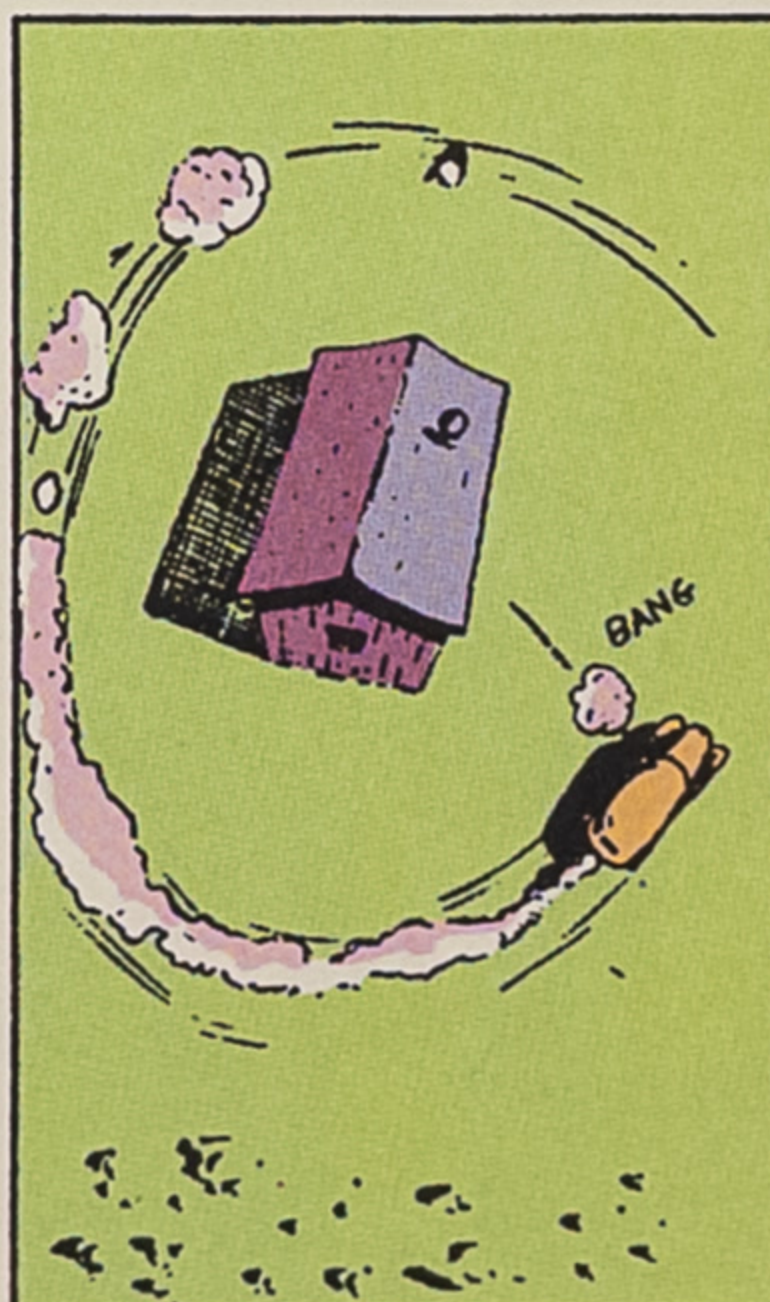

Homer even asks about the renovations.

Since we last saw Homer in the second **Spirit** strip, his fiancée has left him. The fiancée is Commissioner Dylan's daughter, Ellen, who the

Spirit gussied up at the end of that strip in a profound act of misogyny. He and Homer discussing it here explicitly objectifies the character again, and Ellen has clearly internalized it. She's no longer interested in criminal psychology, she's going to be a chorus girl.

The Spirit has a plan, however. He's going to kidnap Ellen and then Homer will come and save her. She'll think Homer's a hero, Spirit's a sap, and everything will be jake.

Except Ellen is working for a gangster. But that gangster—who's producing her show on Broadway—doesn't know about it until opening night, when one of his flunkies recognizes her. She's there under a pseudonym—Daisy Kay. There's a quick scene to establish Dolan's worry that she'll ruin his reputation as police

commissioner, which is precisely the gangster's plan. Reveal her true identity, humiliate the commissioner, get the mayor to fire him for having a low-class kid.

So the gangsters don't like it when Spirit swings down onto the stage and grabs Ellen, running off with her over his shoulder. They give chase, which results in a fantastic series of action sequences. First there's an autplane bit, then there's a Spirit fighting guys in a car bit, then there's Ellen and Spirit under siege in a remote cabin with gangsters circling them firing on the cabin bit. It's all glorious, it's all beautifully visualized, even if the interludes are just Spirit being a mega-jerk to Ellen for Homer to capitalize on eventually.

Will Homer save the day and get the girl? Or are things more complicated in love and war?

More importantly, what happened with the last big action panel—despite all the two-fisted fisticuffs, Eisner and the studio can't render the slightest dodge?

Maybe they just didn't have the space. Doesn't matter; it's an excellent strip. Minus the active and passive misogyny, of course.

## “THE MORGER BOYS”

August 18, 1940

Will Eisner (editor, script, pencils, inks)  
Joe Kubert (colors)  
Sam Rosen (letters)

*Morger Boys* has maybe one bad moment, some missed opportunities, a peculiar finish, and fantastic action. The strip opens twenty-five years ago—so, you know, 1915—with the execution of a notorious murderer, Morger.

Mrs. Morger makes their four sons promise to avenge Papa's death twenty-five years later.

The story jumps ahead, revealing the Morger Boys all look alike—kind of jovial so their murderous ways contrast—and are ready to execute their plan. One of them reveals the targets, and the brothers get to work. Never explained are their preparations for this plan. Nor if they're all dressed the same as a bit or because it's just a good visual idea (for Eisner).

The brothers only drive the strip for the first few pages, then one of their targets hires the Spirit as a bodyguard. The Morger brothers are ready for Spirit, who is very much not ready for them. After the quick fisticuffs, Spirit is knocked out.

Luckily, from his criminology studies—which did not include clearing a room, based on this strip—Spirit remembers the Morger family had a weird old stone cabin near the jail and it'd be the perfect place to execute your enemies.

The contrived eureka moment gives way to Spirit busting into the house just in time to save hostages and kick ass. There are some startling panels this strip; sublime work, with the lines getting more and more assured. **Spirit** is coming into its own, visually, week by week.

Eventually, Dolan will arrive and follow up on one of his own related leads. Dolan and Spirit don't talk about the Spirit being wanted for murder, instead they kick the Morger Boys' asses. I think it's the first time Dolan ever starts busting heads in the strip.

The finale is bizarre, involving what could possibly be considered character development for Spirit but also maybe isn't; it's notable

primarily because it tries to leverage the “grateful dame” trope.

Maybe only in the funny pages.

It's a solid strip, with that bad moment—pointlessly flexing supernatural—sailing past for another fine action thriller for the Spirit.

## “THE ORPHANS”

*Orphans* is about the Spirit taking a young orphan, Billy, slumming in the underworld. Spirit comes across Billy and his friend, Barney, in the cemetery smoking cigars and getting sick

from it. Barney's trying to convince Billy to join a gang with him. Spirit interrupts; Billy thinks Spirit's swell, Barney thinks "crimefighters" stink.

After Barney heads off to join the gang, Spirit takes Billy back to the crypt lair to get some information on Barney's future mob boss. Once they've got that information, they head out, with the Spirit busting heads until they get to the big boss.

The "boss fight," which barely involves the boss, has Spirit fighting a dozen opponents. It's a beautifully choreographed punch-out, starting with Spirit escaping his restraints and knocking heads. The Spirit moves between panels gracefully, almost patiently, working his way through one thug or four. It's a beautiful sequence. And then it keeps going. And keeps

going again. It's an incredibly long, absolutely fantastic action scene. Eisner keeps coming up with something new; even some of the familiar poses, with Spirit's sockless ankles visible, are fresh; Eisner's figured out how to string the visuals together, finding the rhythm of the scene, and it's sublime. *Orphans* has some of the best art in the strip so far, even if the splash page is an almost hokey picture of the Spirit, looking like the cover of a country western album. It's a combination of the concept, the pose, and some very stiff lines.

Then, the art of the boys is very expressive and fun. Eisner and studio exaggerate their expressions, particularly when sick from cigar smoke, giving the strip some extra pizzazz.

Until the mega fight starts, *Orphans* is just Spirit lecturing Billy about how crime doesn't pay. He shows him some examples, but they're exaggerated ones involving comic strip gangsters. Billy's eventual reckoning doesn't even involve any "organized" crime. It'll be an emotional reaction, which is weird. But it's also a very thin message—kids always need to remember to tell other kids: crime doesn't pay.

It's a gorgeous strip, with some solid writing on the kids (Barney's a fun little shit), and the didactic stuff can't overwhelm the strong comics.

## “ORANG, THE APE-MAN”

September 1, 1940

Will Eisner (editor, script, pencils, inks)  
Joe Kubert (colors)  
Sam Rosen (letters)

*Orang* is a Frankenstein story from the monster's perspective. The Spirit is still around, but he doesn't have anything to do with the actual action of the strip. Instead, it's the sad tale of Orang, an orangutan, turned into a being with human-level intelligence thanks to a mad scientist.

Eisner and studio do a fabulous job setting up the story. There's a scientist arriving from war-torn Europe, escaped and ready to reunite with his daughter, Elsa, in his friend's care. Little does Elsa's father know his friend is a fiend and has used parts of Elsa's brain to make Orang smarter. He has left Elsa a savage.

So we get a cave girl and an orangutan in a suit for the action here. There ought to be more tripping on tropes, but somehow there isn't. Eisner avoids sentimentality, even as horrifying tragedies unfold, even as Orang comes to the realization he does not want the burden of reason, and begs his creator for mercy.

There's some excellent art. Lots of establishing panels this strip, setting the stage, but also giving Eisner a chance to summarize in long shot. The strip's rapidly paced; once Orang decides he wants to devolve, it's pretty much all action. Fight, chase, fight, tragic finish, with the Spirit only arriving to provide commentary on the sad situation.

Without ever having met Orang himself.

The Spirit's subplot is very moody. He gets drawn into Elsa's father's troubles, having gone to meet the scientist to ask about some experiments. Long shadows as he enters and exits through balconies and so on. The father's anguish gets some attention, too. Not verbalized

like Orang's will be, but very carefully visualized. *Orang's* got its *Frankenstein* ambitions and whatnot, but the strip excels because of the craft on display, where Eisner and studio flex, where they do not. It's tragic. And lovely. Just excellent work all around.

## “THE RETURN OF ORANG, THE APE THAT IS HUMAN”

September 8, 1940

Will Eisner (editor, script, pencils, inks)

Despite the immediate follow-up to last strip, we still don't get a big Spirit versus Orang scene. Spirit will track Orang to the ends of the Earth (well, Sumatra), but they never have a real,

intellectual or physical showdown. Instead, they're still in slightly different stories; ships passing in the night.

The strip opens with Spirit recounting last week's conclusion—Orang is apparently dead, at his own hand. No real mention of him killing his creator, which is important since after Orang drags himself out of the river and to a doctor, he's ready to be released on his own recognizance. His suicide attempt last strip came after he killed his creator, but he's forgotten that guilt. And no one's looking for the mad scientist.

Or at least not Commissioner Dolan, who goes to the doctor's to see the talking ape. Dolan can't come up with a reason to hold Orang, so instead, he offers him a place to crash while Dolan tries to find a law Orang's existence violates.

Bored of waiting and seeing an opportunity after Ellen Dolan comes in and passes out at the sight of him, Orang kidnaps her and heads back to the jungle to rule among the lower apes.

All of these events occur in the first four pages of the strip (including the splash page); the remainder is the Spirit tracking Ellen and Orang through the Sumatran jungle and getting involved in the politics of Orang's found tribe. Now, those politics involve fights to the death and the Spirit tied to a stake, but they're just political squabbles. Spirit and Ellen are in a riff on a *Tarzan* story, complete with swinging on vines and (unlikely) punch outs with orangutans.

Then the finale—weeks and weeks after the start of the strip—gives Ellen and Spirit their first

private moment (despite implying, you know, weeks and weeks of them).

Orang remains a very sympathetic villain and shirtless Spirit hacking through the jungle is definitely a vibe, so it all works out quite well. It's just too bad Orang and Spirit never got to talk philosophy.

## "EBONY'S X-RAY EYES"

September 15, 1940

Will Eisner (editor, script, pencils, inks)

Joe Kubert (colors)

Sam Rosen (letters)

*Ebony's X-Ray Eyes* show the problem with caricature, racist and otherwise. At the start of the strip, Ebony gets some of the Spirit's x-ray juice in his eyes and can see through things. He

quickly happens across some crooks who've decided to go into the crooked optometry racket. Once they meet Ebony and get a load of his peepers, however, they decide to become bank robbers.

Spirit discovers the lair in a mess (assuming Ebony's been kidnapped and didn't just have a damaging reaction to the x-ray juice) and starts tracking Ebony down. Now, Spirit's not going to learn exactly what happened until the last page or so—and it might be more implied than explicit—so he's just going to luck into conclusions and discoveries. He's assuming Ebony's been kidnapped along with the x-ray juice—the x-ray juice being the prize here.

Ebony will have some ups and downs with the first set of crooks, who will pass him off to a

second set pretty quickly. It's about young Ebony being moved from one traumatizing situation or another. Eisner and studio address that situation in the writing, albeit with more humor than angst, but the reader's clearly supposed to be sympathetic to Ebony's plight. Except then he's rendered as usual, in a racist caricature one wouldn't want to describe objectively in polite company.

Once Ebony realizes the Spirit is trying to stop the crooks, he takes (some) matters into his own hands, with the rest working out in payroll (i.e. criminals being a superstitious and cowardly lot and not ready for the Spirit). Ebony's got agency, eventually, even though his clumsiness is a principal characteristic.

Outside being horrifically visually racist, it's a good strip. It's well-paced and the comic relief (one of the crooks) is good; **Spirit** is proving it can scale big action to small and stay nimble with its genres.

## “GANG WARFARE”

September 22, 1940

Will Eisner (editor, script, pencils, inks)

Joe Kubert (colors)

The entire strip seems to be just a way to do a panel of Spirit with a Tommy gun taking out the mob. It's a striking visual, and the strip itself is solid, but *Gang Warfare* is more like *Gang Meddling*.

The strip opens with the Spirit saving a gangster from getting rubbed out. Spirit helps him get away—to meet later in Wildwood Cemetery—and deals with the other crooks, then running

He just doesn't want to be cleaning up her love life.

Once it's clear their cases are entwined, Spirit will relent and take Ellen along in his pursuit. That pursuit will involve the Spirit putting on a disguise. The disguise is on his face: muss to make him look old and a ruffled hat. Otherwise he does not change his blue suit. No one can recognize him with that face makeup, despite him wearing the same suit as the scene before.

It's an okay strip, certainly the least in a while. While the *Oriental* aspects of the story seem like they should be in the spotlight, they're very mild. Ellen being an unlikable, shallow harpy, however, is a problem. Especially since the strip itself seems to dislike her.

Big "he-man woman haters club" energy here.

## "THE MASTERMIND STRIKES"

October 6, 1940

Will Eisner (editor, script, pencils, inks)  
Joe Kubert (colors)  
Sam Rosen (letters)

This generally gross vibe continues throughout the strip, whether when Ellen tries to tag along with the Spirit to investigate or when she gets to the resolution and finds no one cares about her feminine wiles.

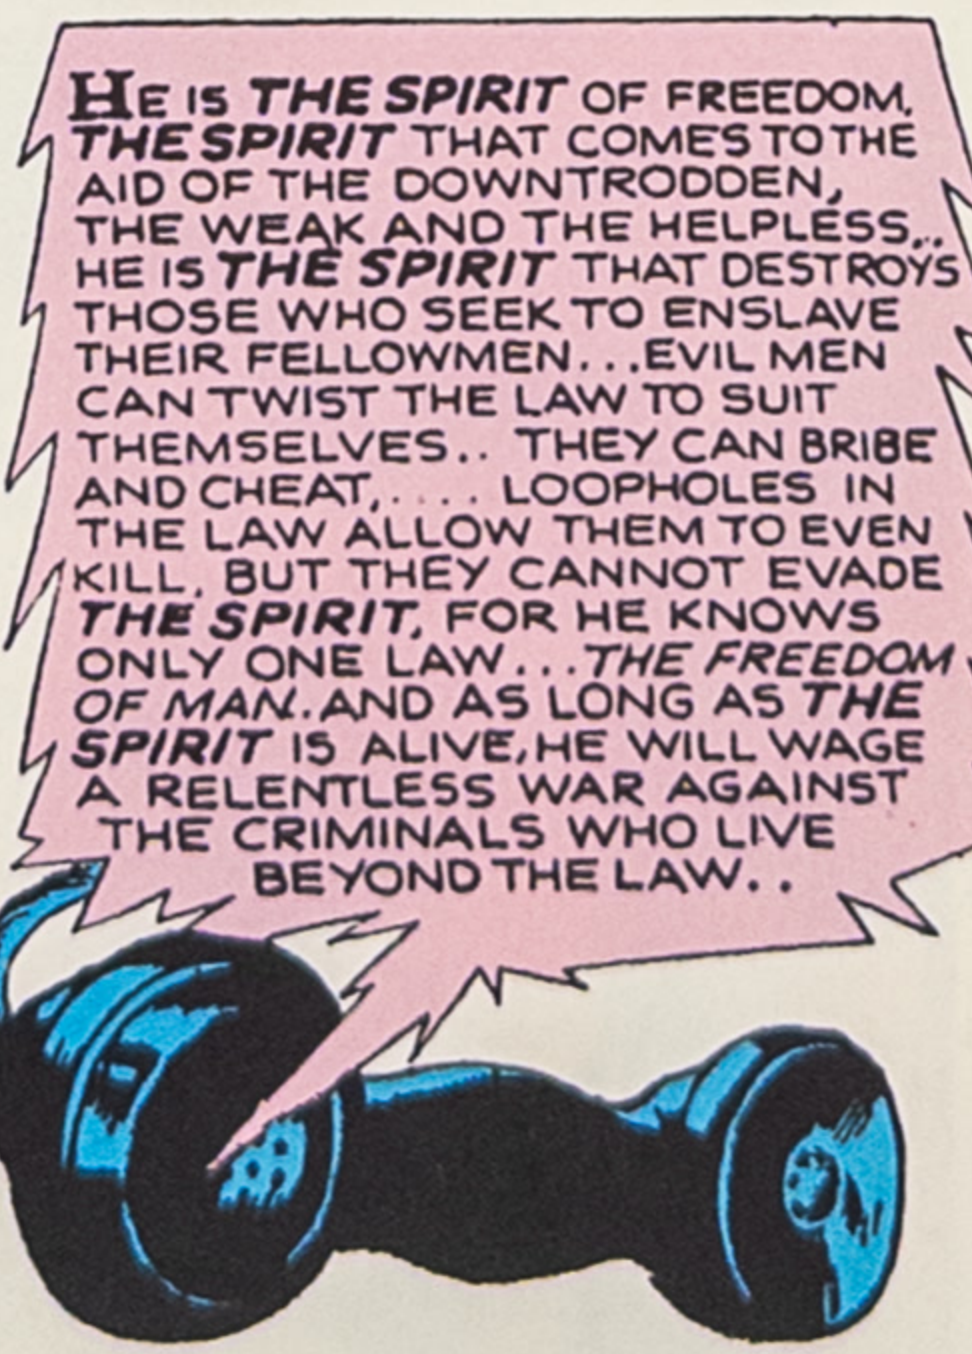

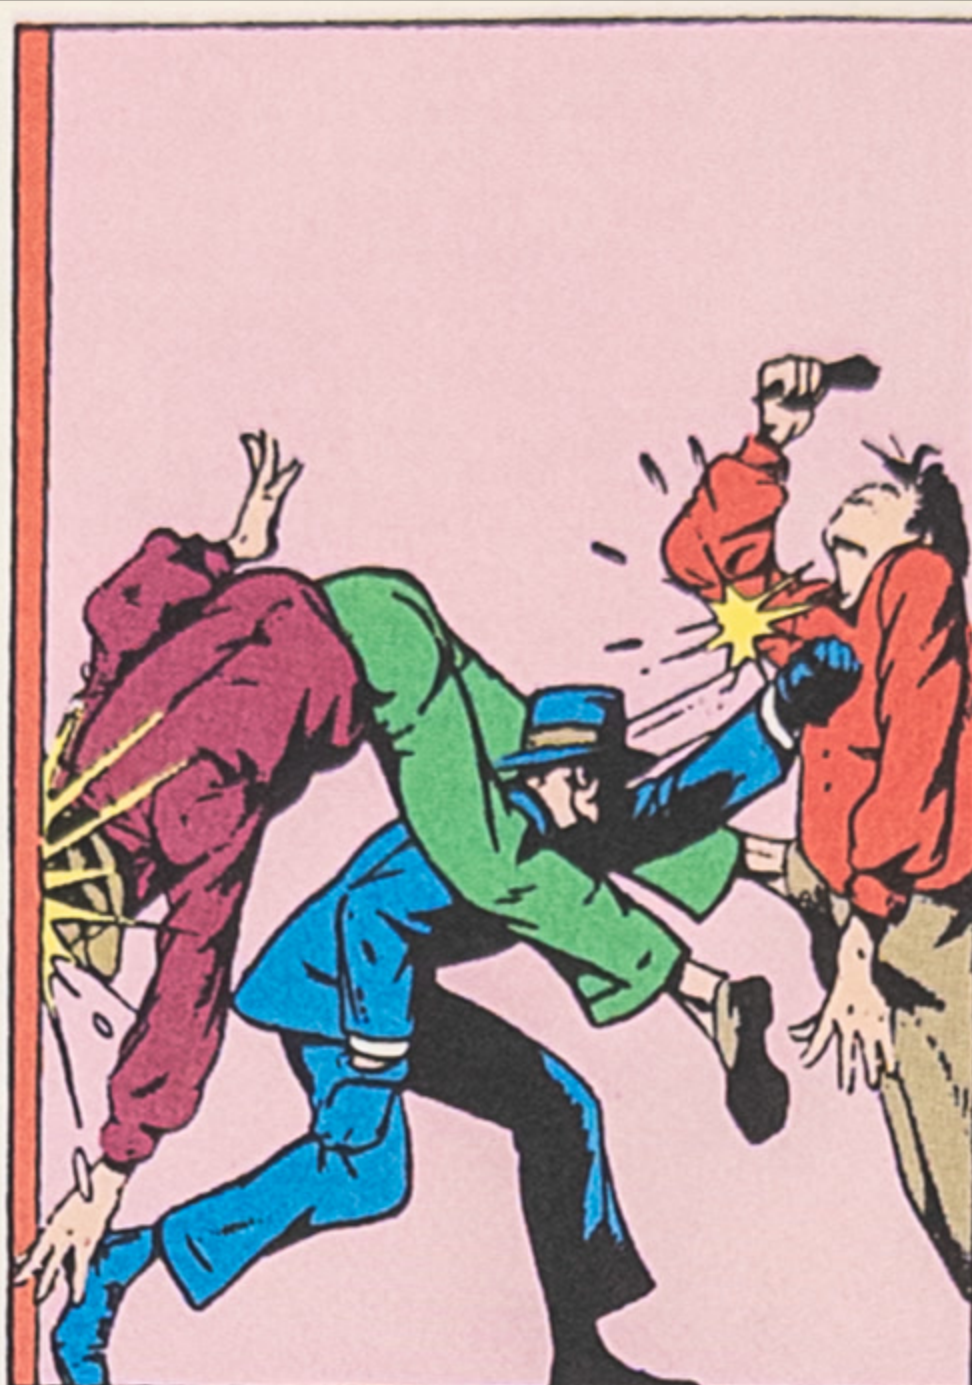

The spies—from the "Asiatic Embassy"—kidnapped Homer to hypnotize him and get him to kill an industrialist. Despite them being the title characters, until the Spirit arrives at their lair—a remote castle—they're barely around. Most of the time is spent with Ellen, Homer, or the Spirit. Dolan's got a little time fretting over Ellen's romantic decisions and expositing about Homer being a murderer (he's not the first guy they've hypnotized into murder). Ebony's also around for a few panels; he was out doing investigating for the Spirit, who isn't as disinterested in the case as he conveys to Ellen.

**The Spirit** tries—very gently—a "whodunit," with the reader getting as much information as Spirit or the cops; more, actually. The whodunit aspect seems half-baked, similar to the rest of the strip. While *The Mastermind* avoids any of **Spirit's** problematic pitfalls, it's also barely a story.

The strip opens with a mayoral candidate's aide dying by poison gas, which the coroner can't figure out. When the candidate visits Dolan to demand action, the Spirit shows up and the candidate remembers Spirit's wanted for that murder from months ago. The candidate

# THE SPIRIT! WHO IS HE?

Daily Press launches campaign to discover identity of mysterious crime fighter. "Are you society's friend or foe?" asks editor Robert E. Grit.

Ever since his mysterious aid in the capture of Dr. Cobra, an escaped mad killer, the mystery man, known only as The Spirit, has secretly helped the police in many ways.

According to information collected by our reporters stationed at Police Headquarters, the solutions of most of the major crimes in our city were due to the efforts of The Spirit.

It was The Spirit who really smashed Tony Morgan's gambling chain. The fantastic attempt by this country's big gang leaders to rob the Sub-Treasury was frustrated by The Spirit. From reliable sources we learn that Yagor, the fiendish creator of the huge robot that ran amuck in our city not long ago, was believed to have been captured and placed in the hands of the police by The Spirit. The four Morger boys had the name of The Spirit on their lips before they were executed by the State.

On one hand he is obviously aiding society, yet on the other this mystery man is accused of causing the death of Eldas Thayer, a respected citizen, and is branded an outlaw by the Police.

What is the explanation? Who is The Spirit?

His description, offered by persons who have seen him, is: over six feet tall, wears a blue mask and blue suit. Any information leading to the identity of The Spirit will be appreciated and kept confidential. All correspondence should be addressed to the editor.

## MAYOR AND CIVIC LEADERS APPROVE OF PRESS CAMPAIGN

In a letter addressed to this newspaper today, the Mayor, speaking for himself and the various civic societies, said that he approved highly of this new campaign to learn the identity of The Spirit. "His frequent escapes," he added, "have made a laughing stock of the Police Force and The Spirit's continued exploits lowers the prestige of our law enforcement bodies."

BY WILL EISNER

demands Dolan arrest the Spirit, but obviously the Spirit escapes.

One more murder and then the "Mastermind" is after the Spirit too, hiring a kid to deliver a bomb to him. Spirit will enlist the kid's help, intentionally putting him in harm's way at one point, as he unravels the case. Except he's just operating off that early clue the reader also got, so it's not a lot of unraveling.

The last few pages have the Spirit getting in a fight with the villain. Lots of empty backgrounds as they punch it out. Even the finish is slight, with Eisner and studio wrapping the whole thing in the last couple panels, including the villain's motives. Given the strip starts promising a "Mastermind"—standing over

a pile of skulls on the splash page—having the villain not just be a done-in-one, but also be far from devious and really just in possession of explosives and poisons the cops can't identify.

There are some nice establishing shot panels of the city—long shots with good angles and nice line work. The action at the end is fine; it just dawdles through action and hurries through the exposition.

Even as the least impressive of **Spirit** so far, it's still rock solid work, technically speaking. Eisner just seems like he's run out of things to try this one.

Outside that gorgeous splash page, of course.

## "THE SPIRIT! WHO IS HE?"

October 13, 1940

Will Eisner (editor, script, pencils, inks)  
Joe Kubert (colors)  
Sam Rosen (letters)

The splash page for this strip is a newspaper article about the Daily Press declaring its mission to uncover the Spirit's identity. The article gives a rundown of (some of) the strip so far, including the Spirit being wanted for murder.

That murder will get discussed a few more times—and its "solving" is so simple one wonders why the Spirit waited so long to get it cleared up—and Eisner and studio clearly did not think all their readers were getting through that newspaper article. Every time it comes up, we get extra exposition on the subject. At one point, the mayor makes Commissioner Dolan tell him all about the murder charge only to remember

he was in that scene so knows all the information.

Separate from the Spirit's quest to clear his name, a gangster decides to impersonate the Spirit (all it takes is a blue suit, after all) to commit crimes and taunt the police. Oh, and the Daily Press reporter—in from the war in Europe, but this story's bigger—gets help from a cop to uncover Spirit's secrets.

The three subplots never quite converge—the reporter's adventures stay mostly distinct except when the plot needs to move along a little—and then Dolan gets the ending. In some ways, it's an entirely functional strip: the Spirit's (false) murder charge gets resolved. Along the way there's some humor at the reporter's expense (Ebony's contribution) and a variety of action. Besides the Spirit going around town, the gangster impersonating him is out causing trouble. It all leads to some glorious fisticuffs.

While the strip itself isn't particularly ambitious, Eisner has several art flexes. The repetitive exposition usually gets some inventive panel composition. Even with the heavy-handed finish (Dolan talking about the Spirit being the dark knight the city deserves), it all works out. The art and narrative choices put the relatively slight story over.

• • •  
“OGRE GORAN”

October 20, 1940

Will Eisner (editor, script, pencils, inks)  
Joe Kubert (colors)  
Sam Rosen (letters)

It's another slighter strip, with the Spirit rescuing a damsel in distress from her ex (the titular *Ogre Goran*), a psychopath who's just escaped prison.

The opening is the prison break and it's relatively solid business. The line work is wanting this strip, but the moody long shots of the action are still effective. The action shifts to the damsel, Mary, discussing Ogre's prison break with her husband. Since it's a comic strip, Ogre appears immediately following her statement, shooting her husband dead on the spot and ready to kidnap her. Luckily, Mary dowses him in alcohol and sets him (and the apartment) on fire.

Now, we know Ogre gets away because he gets in the shower and turns on the cold water. Also, there's a panel (maybe the least discernible in the series to date) of Ogre getting away.

WITH THE SPEED OF SUDDEN MADNESS, MARY LEAPS...SEIZES A LARGE CAN OF ALCOHOL...

DRENCHED WITH THE LIQUID, HE PURSUES HER FROM ROOM TO ROOM.

HIS ALCOHOL-SOAKED CLOTHES QUICKLY BURST INTO FLAMES... IN A WILD FRENZY HE LEAPS ABOUT FRANTICALLY, SETTING THE ENTIRE HOUSE AFIRE.

THE HOUSE NOW A BLAZING INFERNO, GORAN REACHES THE BATHROOM... WITH BLISTERED FINGERS HE TURNS THE KNOB OF A SHOWER.

AND FLINGS HIMSELF UNDER ITS EXTINGUISHING STREAM.

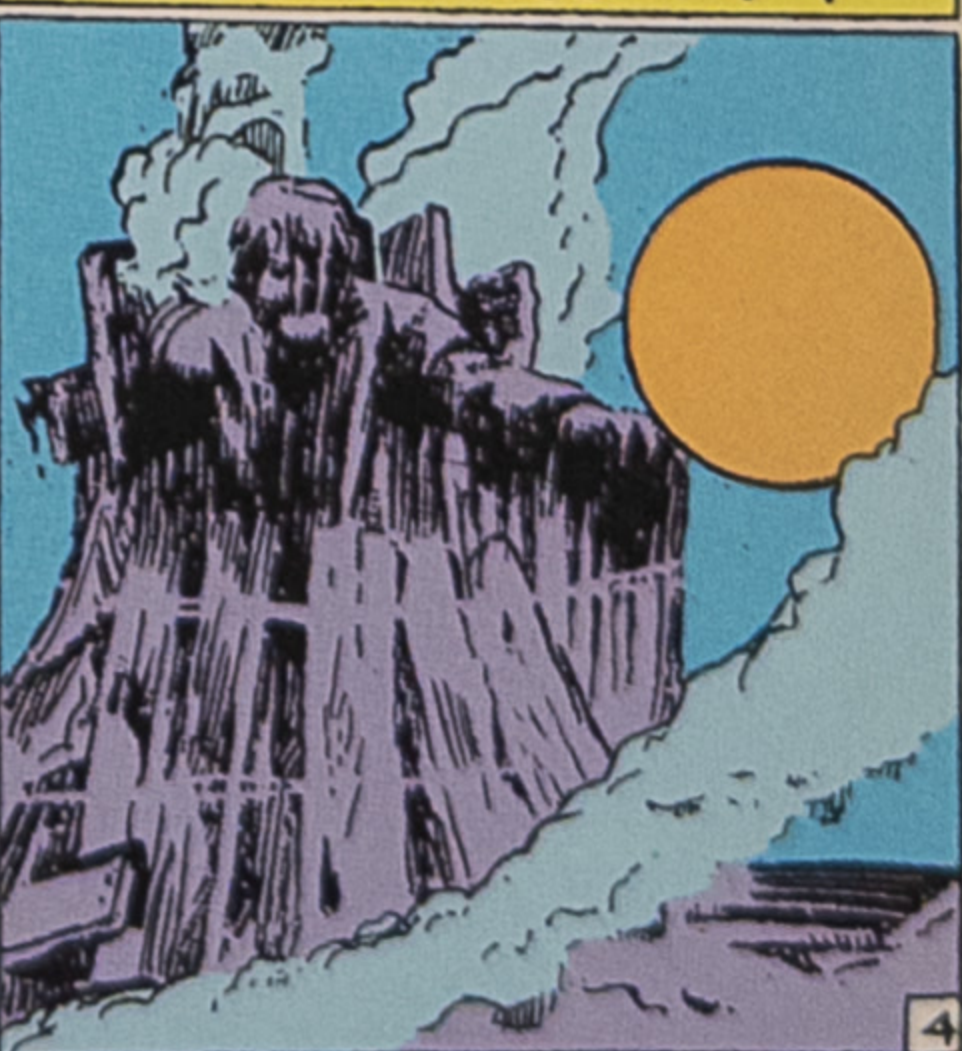

THE POLICE AND FIREMEN SOON ARRIVE AND RESCUE MARY FROM THE BLAZE.

WE COMBED THE PLACE, CHIEF... CAN'T FIND HIM!

BUT AS THE WAIL OF THE ENGINES DIES IN THE DISTANCE, A HORRIBLE CHARRED FORM RISES FROM THE WRECKAGE AND STUMBLES AWAY INTO THE RISING FOG.

"CONSCRIPTION BILL SIGNED!" (OCTOBER 27, 1940), PAGE 5  
WILL EISNER'S THE SPIRIT ARCHIVES, VOL. 1 (DC COMICS, 2000).

Fast forward a few days to Ebony trying to get the Spirit interested in the case. After initially discounting Ebony's thoughts on Ogre's survival (Spirit thought the shower was only running because someone wanted a bath), the Spirit agrees with Ebony's conclusions—Ogre's alive!

The Spirit tries to find Mary, only to learn she's gone away with a man entirely wrapped in bandages. Ogre, post-burns. Thanks to Commissioner Dolan giving him information about Ogre's old hideouts, Spirit heads (by boat) to an abandoned lighthouse where Ogre's got to be holding Mary. Dolan heads to the lighthouse, too, wanting to beat the Spirit to the punch.

Spirit's only cleared his "name" of a murder charge in last week's strip, so Dolan competing with him doesn't make much sense. It also

doesn't make sense how Spirit gets to the lighthouse by boat, but then his boat disappears and he can't take it back to shore at the end of the strip.

Also nonsensical is Ogre having a new wife, who can—presumably, more appropriately—beat up Mary.

We don't even get to see Spirit and Ogre's fisticuffs.

Not a lot of pay-off in the strip, though it's nice to see Ebony developing as a sidekick.

It's also the dottiest the art's been in ages. The line work gains slide back here.

## “CONSCRIPTION BILL SIGNED!”

October 27, 1940

Will Eisner (editor, script, pencils, inks)  
Joe Kubert (colors)  
Sam Rosen (letters)

It's a good thing Spirit cleared his name since he needs Dolan's official recommendation this strip.

FDR has just signed the Selective Training and Service Act—a peacetime draft—and, being a good jingoist, the Spirit wants to sign up. He's got some conditions, however. He doesn't want to reveal his identity and he wants to be put to good use (based on his skills).

The Army thinks he'll make a good espionage agent, especially when the Spirit immediately uncovers a spy in the Army recruitment office. As a try-out for the Army, he roots out the rest of the spies, who call him “Americano” but also have guys named Adolf. **Spirit** still isn't willing

to be specific about which foreign powers are the baddies.

The action's pretty straightforward, with Spirit tracking the bad guys back to their hideout and taking them out. He's got Ebony along for backup, so there's some comedy action involving Ebony flying the autplane and seeing trouble on the ground.

Dolan's particularly pissy about Spirit this strip. Dolan's jealous about Spirit breaking all the big cases, a bit of character development Eisner's had on a slow boil for a while now, though it never made sense when Dolan was lowkey protecting the Spirit from the rest of the police force.

The jealousy just leads to banter—and whining—as the Army comes to realize having the Spirit on the payroll will work out, after all.

While it's an interesting attempt at being timely—though the draft was for twenty-one to forty-five and the Spirit says it's just until thirty-five, so they needed some copy-editing—it's also just propaganda. At times well-illustrated propaganda, to be sure, but there's no oompf to the story.

And Spirit mansplaining the United States being the only place on Earth where a man can live in freedom and peace to Ebony (thankfully in long shot in one of those pretty propaganda panels) is one hell of a flex.

## “THE MANLY ART OF SELF DEFENSE”

November 3, 1940

Will Eisner (editor, script, pencils, inks)

Joe Kubert (colors)  
Sam Rosen (letters)

The splash page is Ellen Dolan with a black eye, reading *The Manly Art of Self Defense*. Given Ellen's last appearance in the strip, it's a sensational and not unconcerning opener. But it'll all work out, with *Self Defense* possibly the best **Spirit** strip so far.

We open in Wildwood Cemetery, Spirit running into the crypt, begging Ebony to hide him. Ebony wonders what could have the Spirit so scared... why, it's just Ellen Dolan. She's told the Spirit she loves him and he's run away. She decides to catch a criminal to prove herself worthy of his attention.

Except the criminal she goes to catch is dead, and an enforcer is just arriving to find her there.

"THE MANLY ART OF SELF DEFENSE" (NOVEMBER 3, 1940), PAGE 3

"THE KISS OF DEATH" (NOVEMBER 10, 1940), PAGE 6  
WILL EISNER'S THE SPIRIT ARCHIVES, VOL. 1 (DC COMICS, 2000).

Luckily, the Spirit convinces the thug Ellen's not the killer, except she then wants to identify herself as the commissioner's daughter, which would complicate matters.

The Spirit will eventually find the killer, defeat the gangsters, and generally save the day. Ellen will get that black eye. And, then, in the glorious last page, pay the shiner back in full. Along the way, there are multiple action and suspense sequences. The line work is gorgeous, as are all the shadowy panels. Eisner and studio really go for mood this strip and it pays off. They also play with color in the last action scene, setting it in the dark (blue), and it's a dynamite visual. The Spirit's got a lot of gangsters to get through before the day'll be saved. The strip's seven pages, not including the splash, and three of those pages are superlative. The flow between the panels, the change in angles and distance, the expressions, the fisticuffs... it's all just fantastic.

But what will put it over is how the strip deals with that first plot line—Spirit and Ellen—things have gotten a little more complicated and there's not exactly a lot of time to wrap it. Still, Eisner leaves the couple's relationship in a far more interesting place than it's ever been before. And without being crappy to Ellen.

Maybe minus her naïveté in going after the criminal at the beginning (the strip has forgotten she's in school to be a criminal psychologist or whatever).

Anyway.

*Manly's* a beautiful piece of work.

## “THE KISS OF DEATH”

November 10, 1940

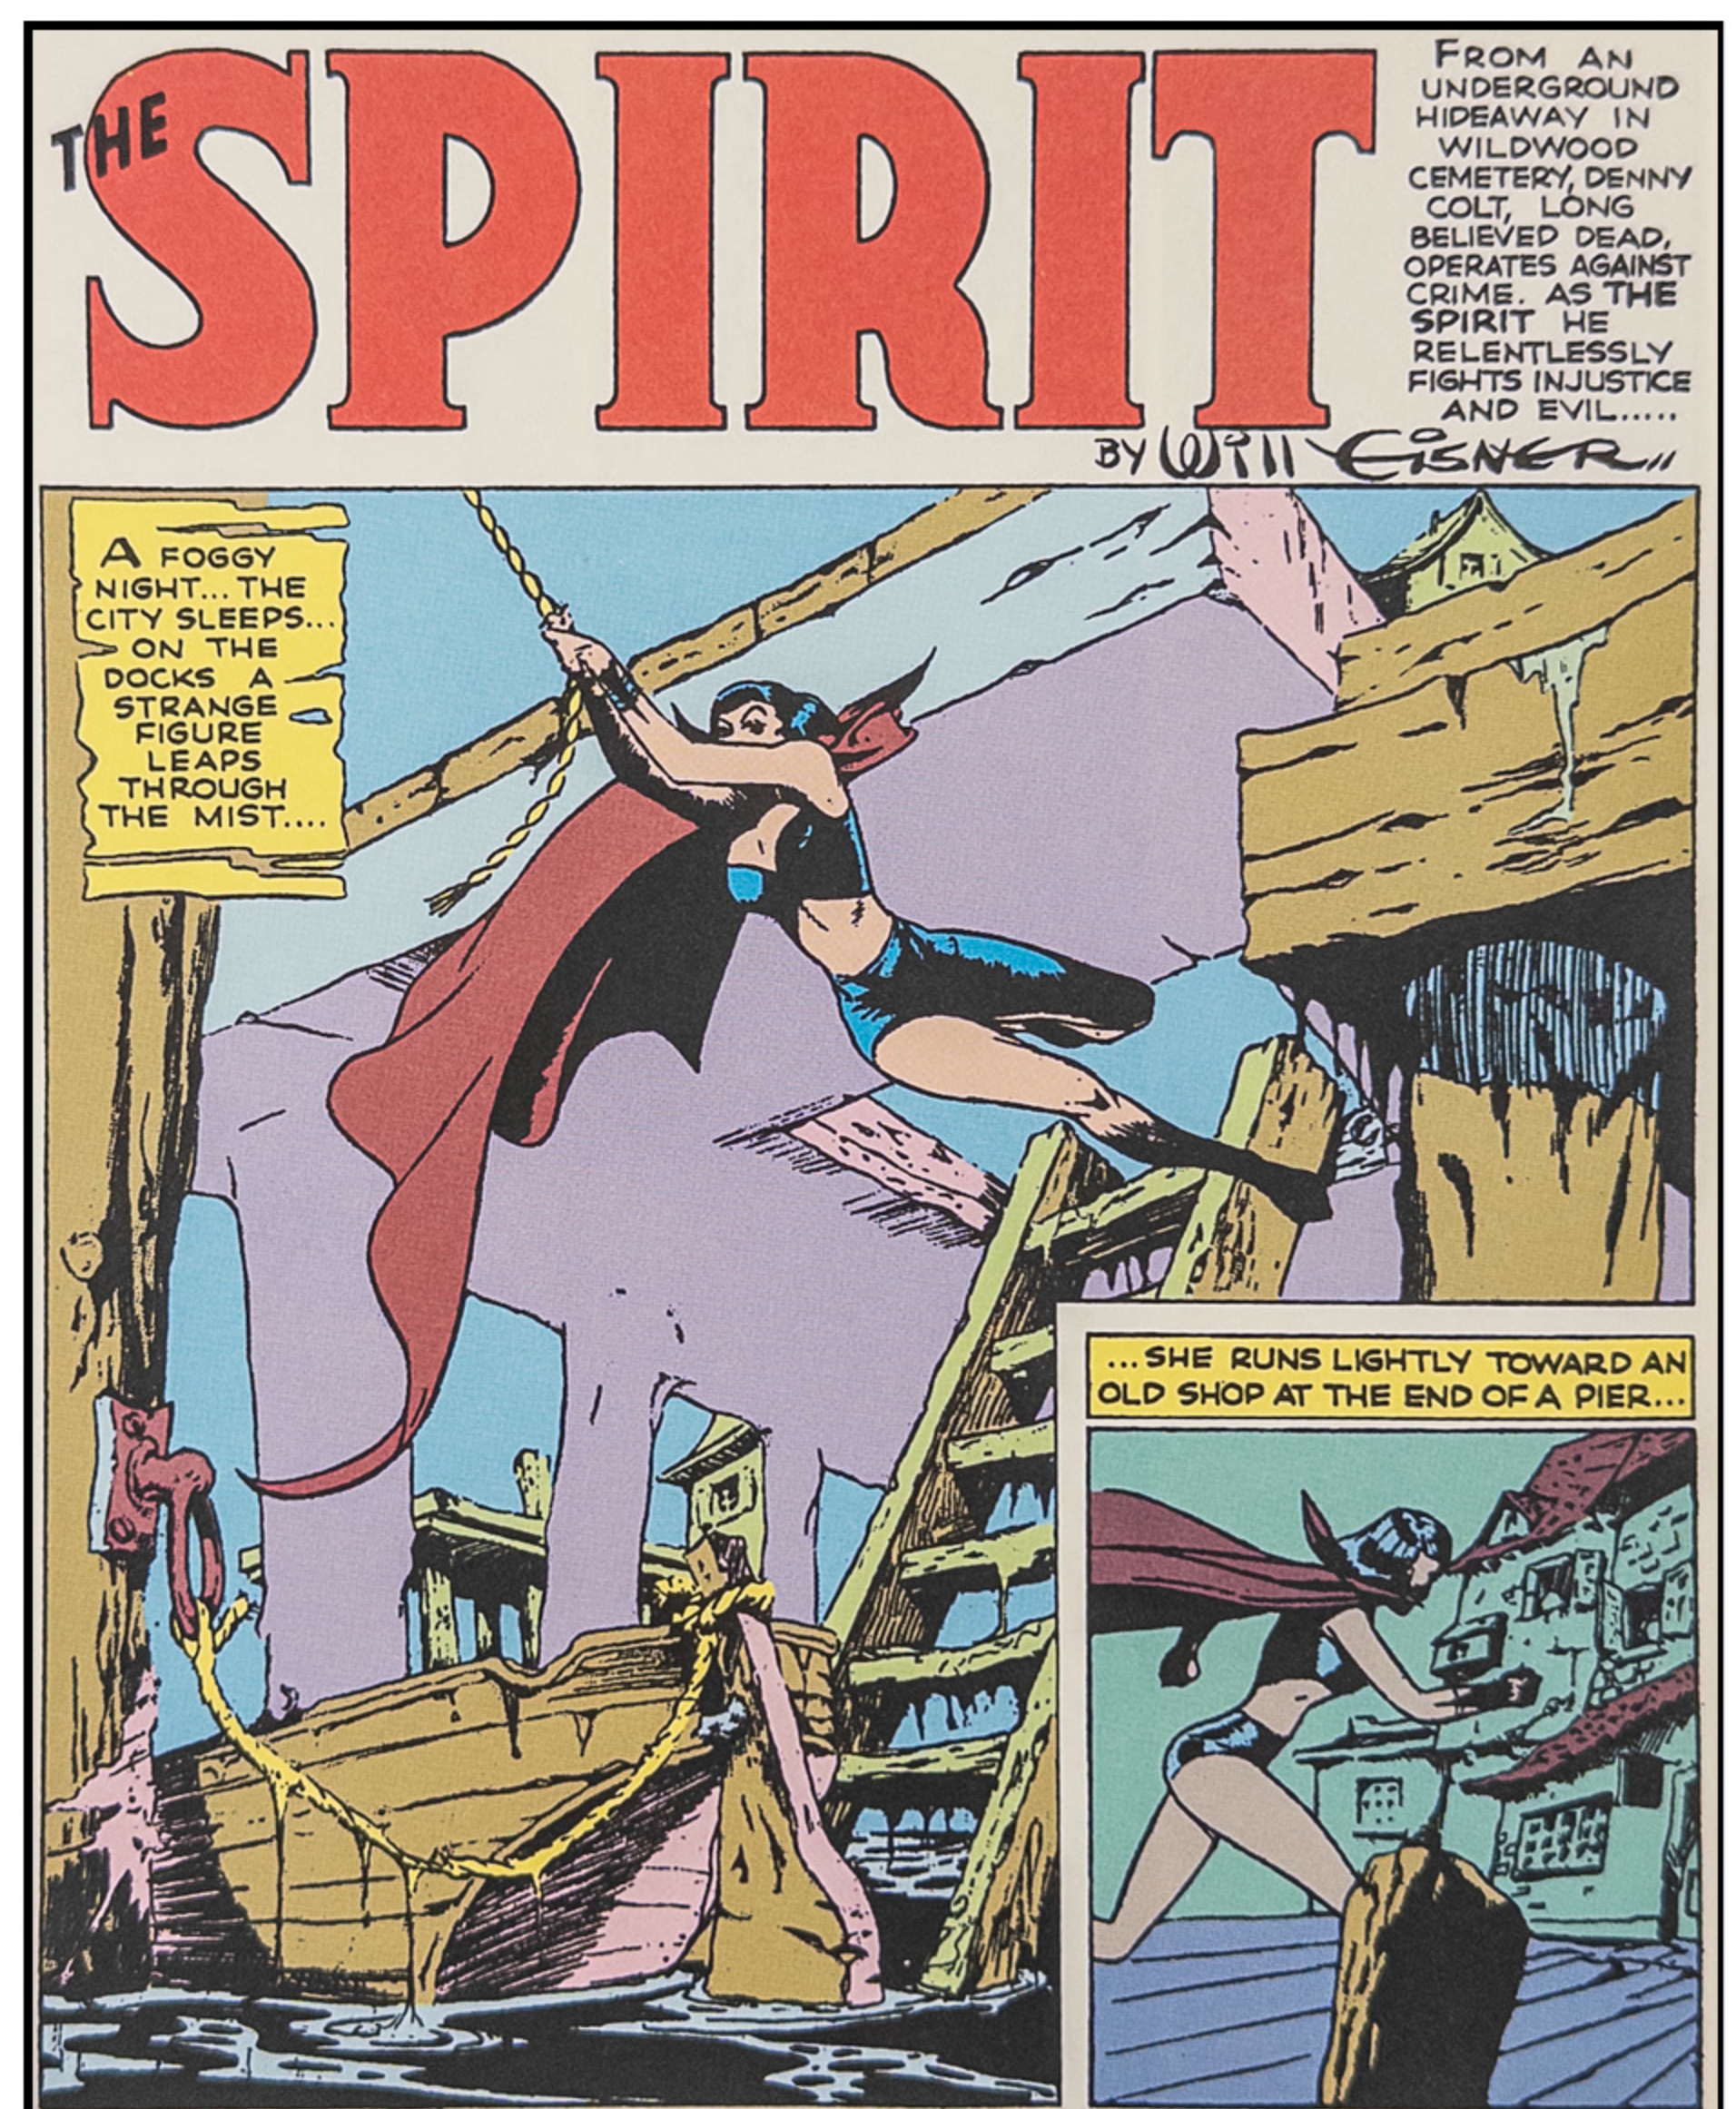

Will Eisner (editor, script, pencils, inks)

Sam Rosen (letters)

The Black Queen's back again, this time fully in her supervillain period, wearing a skimpy outfit and a cape. Far cry from when she was a “notorious female mouthpiece.” But also a far cry from her scheming in the shadows to take over the city with an army of gangsters.

Now she's just seducing men, getting them to betray their employers (and wives), then killing them for good measure. With killer lipstick, something Commissioner Dolan really should figure out before the last page of the strip.

It's mostly an action strip. After some setup with Black Queen and the connection between her victims, Spirit starts chasing her, and then there are only occasional interruptions to their action sequences. They have a big showdown on a bridge, with Eisner and studio getting to do a lot with the angles not to mention the actual fisticuffs (or whatever the equivalent since Spirit doesn't want to hit a lady).

While Black Queen becoming a supervillain is certainly a surprise character development (especially since her plotting has downshifted from robbing the federal reserve to robbing a jeweler), the strip's got so many great moments one doesn't slow down to think it through especially since there's so much humor running through it.

One of Dolan's cops is convinced—always—the Spirit has done it. So every once in a while, someone will have to remind him, but no, it's obviously not the Spirit. But the recurring humor gag works, especially once it's clear they're not giving it up just because Spirit didn't do it.

There's also some "Spirit invents" this strip, with suction cup shoes playing into the chase sequence at one point. Again, despite Black Queen putting on a leather bikini, a cape, and some stilettos—it's a great kitchen sink of **Spirit**. There's personality from Dolan (contending with his dimmer bulbs), Spirit getting in some banter, and a nice "first act" setting things up.

And the art, obviously. The art's so dang good. And the exposition's working on getting witty, too.

It's another political intrigue strip, with a European writer arriving in the U.S. after escaping growing fascism in his country. He's immediately confronted by secret police from his country, who taunt him with the news they've captured his daughter and will execute her unless she returns. So he plans to return immediately, but not quick enough the Spirit doesn't confront him and offer a plan. What if the Spirit poses as the writer, goes in his place, and gets the daughter out?

"THE KIDNAPPING OF EBONY" (NOVEMBER 24, 1940), PAGE 5  
WILL EISNER'S THE SPIRIT ARCHIVES, VOL. 1 (DC COMICS, 2000).

Being an American, the Spirit doesn't give the writer any choice in the situation, and they start prepping Spirit for the mission.

Once in the (fictional) European country, the disguised Spirit has a brief meeting with the daughter—long enough to discover the country's dictator isn't going to free her in exchange as promised—and then goes about breaking out of his cell. There are a couple escape-related gags, with Eisner and studio hurrying things along so they can get to the action.

In addition to escaping the guards in the palace, Spirit's going to have to do some swashbuckling, some flying, and some reassuring (the daughter has never heard of the Spirit, being a European gal and all). There's also the "world domination plans," which Spirit and the daughter decide to grab before they leave, leading to a few more panels.

The strip moves briskly, never slowing down too much for an action sequence, though clearly reveling in the swashbuckler sequence. It's a good sequence. They've also got the Spirit in disguise for a good few pages of the strip, leading to the disconcerting moment when they do some beefcake of Spirit punching his way around the castle. It's fun stuff, if a little slight. This one's how you do the overt jingoism (save the obnoxious American superiority business, obviously).

The last page is mostly post-resolution, with Ebony getting his own quick adventure. However, it does draw attention to the strip not knowing what to do with supporting cast when the Spirit's ostensibly on a six week mission and whatnot.

Minor gripe for an otherwise solid strip. And it's not like the finale isn't amusing, it's just... nonsensical, too.

## "THE KIDNAPPING OF EBONY"

November 24, 1940

Will Eisner (editor, script, pencils, inks)  
Joe Kubert (colors)  
Sam Rosen (letters)

It's an all-action strip, opening with a thug on the run from the Spirit, desperately clamoring to be let into the hideout. Moments later, the Spirit breaks through the door.

The thugs have kidnapped Ebony in order to lure the Spirit away from his hideout, so they can then torture the location information from Ebony and go plant a couple bodies there. The

police will find them and the Spirit will be a wanted man.

Now, as ever, none of the thugs think about just shooting Spirit dead when they have him standing idle, listening to their schemes. Instead, Ebony's able to get Spirit a pistol—in what, visually, seems to be a racist caricature gag but we'll not dwell—and so Spirit can start kicking butt.

Despite being restrained for some of it, Ebony plays a big role in that butt-kicking. It's a good “dynamic duo” strip for Ebony and Spirit. The thugs' plan is entirely based on their partnership and friendship, and even though Ebony's not two-fisted like Spirit, he's got some moves when it comes to putting down the gangsters. And he never squeals, even though they're torturing him.

Juxtaposed with this extended action sequence is the gang's seemingly legit boss trying to convince Commissioner Dolan and the mayor to investigate the Spirit's hideout for bodies. The boss just doesn't know where the hideout's located... yet.

The scenes at Dolan's office—at least after the first one, which sets up the strip—are breaks from the relentless action. And even though it is just action, Eisner and studio turn it up as far as panel composition and choreography. At one point, Ebony is swinging on a hanging light and we get some great POV shots of the floor. Even that opening chase sequence has a lot of angle work. It's a great looking strip.

**Spirit's** such a delight. Minus the occasional Ebony visual cringes.

## “GIRLS' DORM”

December 1, 1940

Will Eisner (editor, script, pencils, inks)  
Joe Kubert (colors)  
Sam Rosen (letters)

The splash page has Spirit with Ellen over his knee, giving her a spanking for some reason. That reason? Only the Spirit knows.

Anyway.

The strip itself has Ellen luring the Spirit up to her college so she can make him take her to prom. She's told all her friends she can do it and just needs a cadaver from the medical school to make it work. One panicked call to Daddy (Commissioner Dolan) and Spirit and Ebony are winging their way in the autoplane.

"GIRLS' DORM" (DECEMBER 1, 1940), PAGE 6  
WILL EISNER'S THE SPIRIT ARCHIVES, VOL. 1 (DC COMICS, 2000).

"THE HAUNTED HOUSE" (DECEMBER 8, 1940), PAGE 2  
WILL EISNER'S THE SPIRIT ARCHIVES, VOL. 1 (DC COMICS, 2000).

We'll also get some nice, gentle teasing about Ellen from Ebony, who knows the Spirit likes her attentions and troubles more than he's letting on. It's another of those incongruities with Ebony; he's the Spirit's only confidant (Dolan knows his origin and home address, but little else), a faithful, determined sidekick, and yet visualized as racist caricature.

Ebony will have a particularly good strip, since he's the one who discovers the actual murder. It just so happens one of the college professors will end up dead as Spirit's investigating Ellen's fake murder. She does try to get him to ignore the corpse and take her to the prom, but Spirit's all business.

The strip is a mix of gentle, pointed, funny, and dangerous, which seems like a perfect **Spirit** combo. Except then the art's a bit of a mess.

There's some outstanding composition, both for the slapstick action (chase and fisticuffs) and the expository long shot panels, but the detail is some of the worst in ages. It's thin, fine lines, then dotty inks on everyone's face. It feels like a new **Spirit** but with the earliest style trappings.

Almost all of the strip plays for laughs; even when you think it's going to be a danger moment, it resolves as a comedy one. So, despite the uneven art and the (more gentle than usual) sexism, the strip's another perfectly solid entry. If only Ellen could come along as a character a little more. Or, at least, not lose her gains between strips.

## "THE HAUNTED HOUSE"

December 8, 1940

Will Eisner (editor, script, pencils, inks)  
Joe Kubert (colors)  
Sam Rosen (letters)

For a relatively simple strip—the Spirit and Ebony go to investigate a supposedly haunted house—there's a lot of exposition involved. We get a history of the haunted house—owned by a guy who has disappeared, the bank is about to foreclose, and it'll go to a gangster who wants to use it as a gambling den (and general purpose hideout), but the Spirit wants the state old folks' home to get it.

About halfway through the strip, we'll get some more exposition about the house, explaining what happened to it before the foreclosure rumblings. A few pages later, we'll get even more. For all that exposition, however, there are still several unanswered questions in the strip... including why the gangster wanted the house

(other than its remote location) and why he never took a look at it.

The “haunting” elements seem to be permanent installations, so any estate agent and prospective buyer would see them.

But, no, it’s just Spirit and Ebony bantering on the way there, then Ebony getting scared by everything and Spirit realizing there’s something else going on. Even as there end up being multiple fisticuffs opponents, and a handful of gags related to haunting the house, the strip finishes feeling more than a little slight. The stakes at the beginning—Spirit wanting to keep the house from the gangster—change in the middle, then change before the end, then are different once again in the last few panels. It’s like Eisner and studio had the idea for a setting, but not really what would go on in it.

Especially considering they reuse actual (and somewhat nonsensical) set pieces.

It’s still a perfectly okay strip, with Ebony around for the banter and some slapstick. The haunted house stuff proves fake reasonably quickly, so not a lot of Spirit in “supernatural” situations, but some nice, shadowy panels for sure. Even if the art’s never quite as tight as it could be.

Again, **Spirit** has raised the bar so much technically, even slighter strips are fine outings.

## “SLIM PICKENS”

December 15, 1940

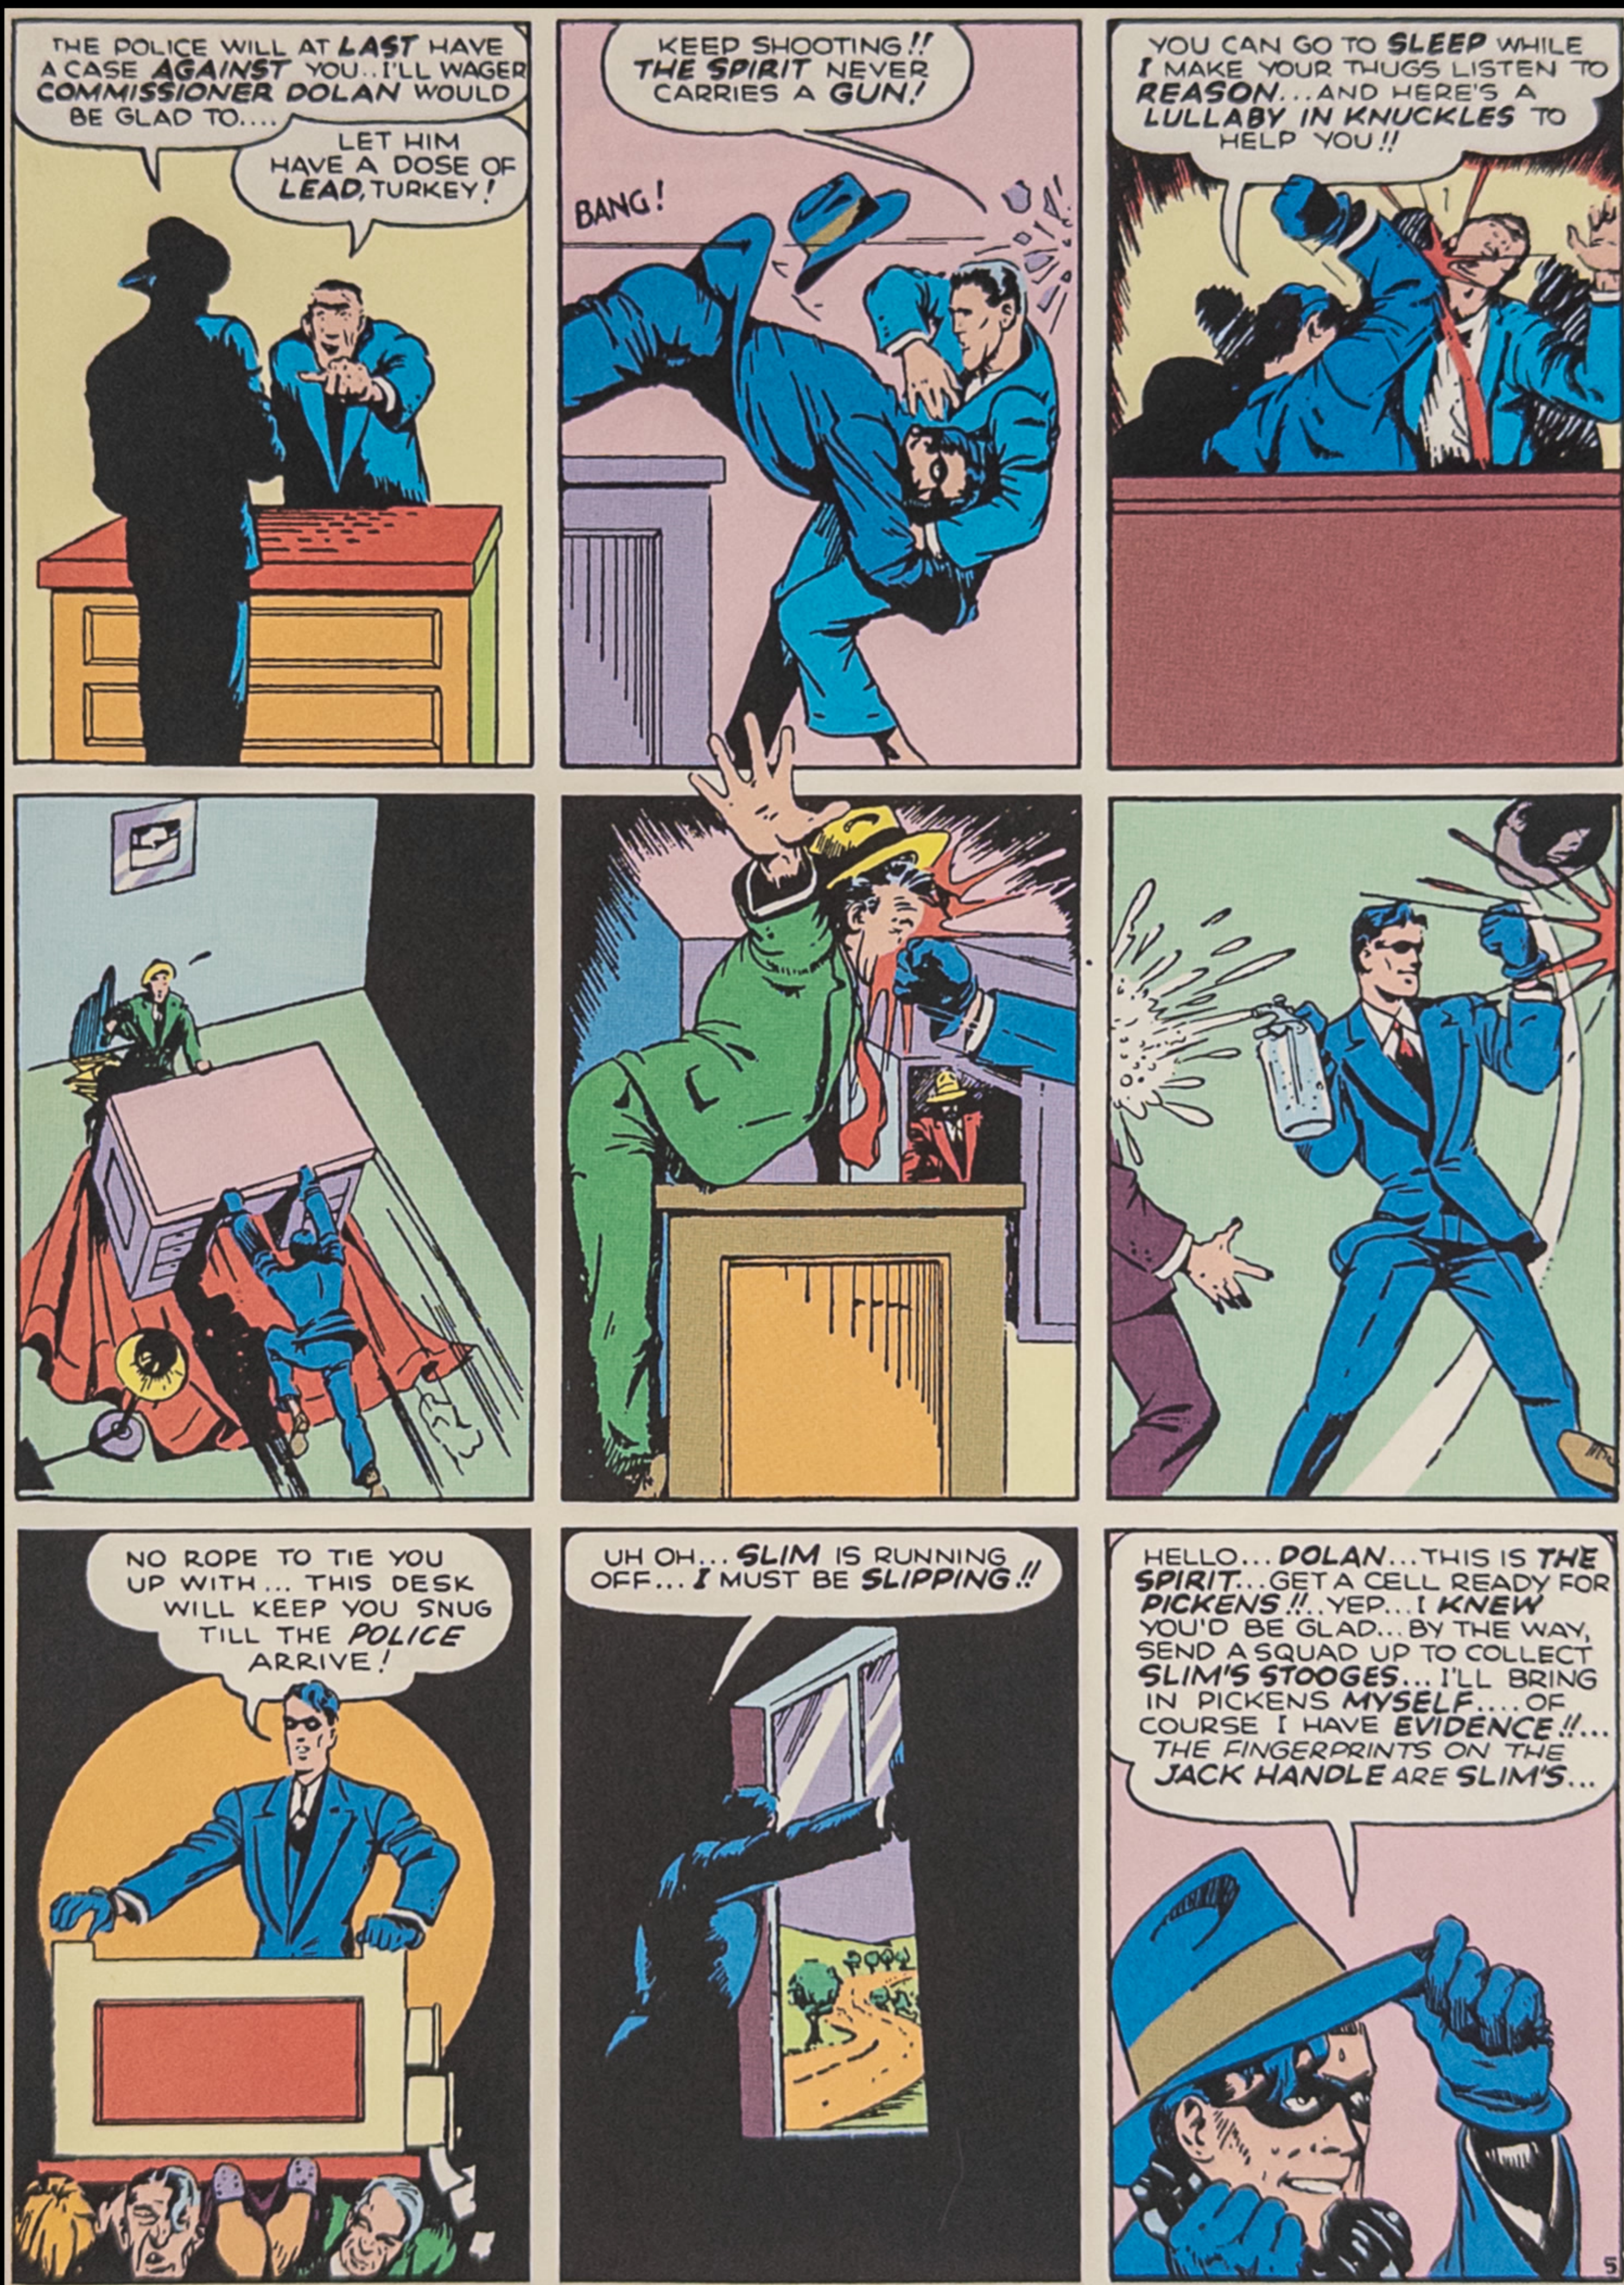

Will Eisner (editor, script, pencils, inks)  
Joe Kubert (colors)  
Sam Rosen (letters)

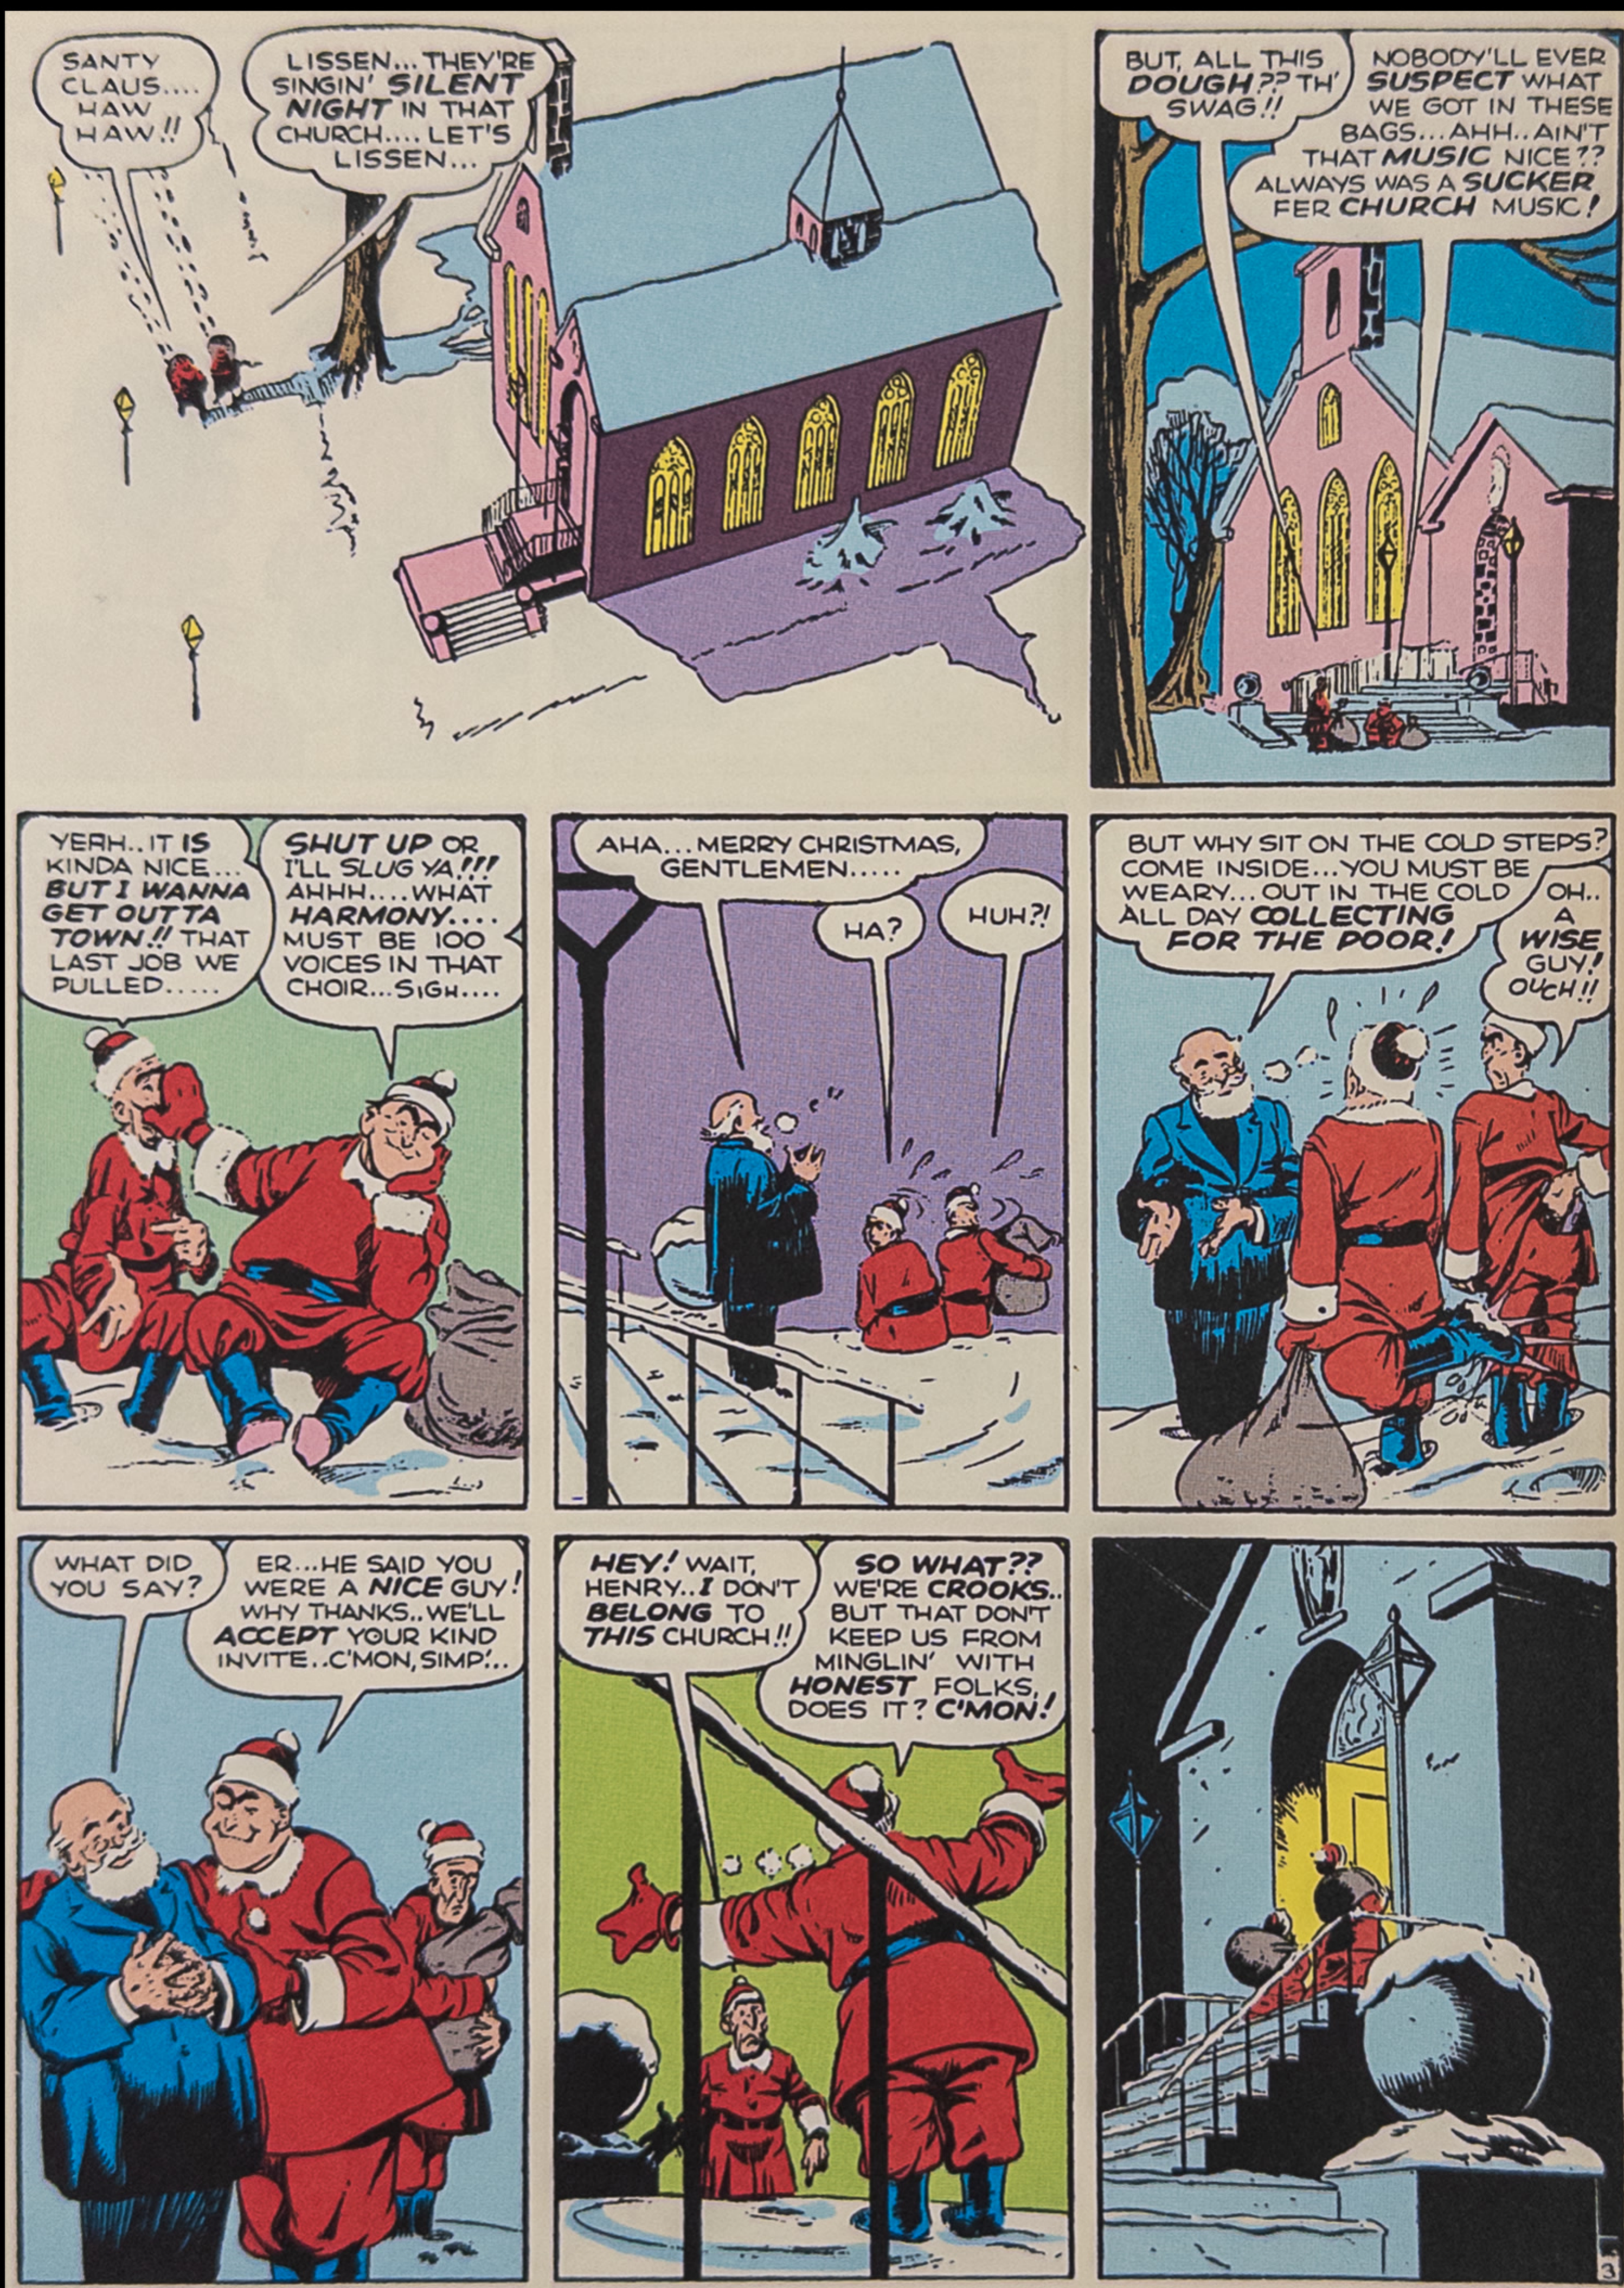

This strip’s an incredibly (and intentionally) didactic tale. A young prisoner is about to be paroled and plans on joining the *Slim Pickens* gang. But just before his parole, wouldn’t you know it, he’s got a new cellmate... Slim Pickens.

Pickens regrets his successful life of crime. To convince the kid crime doesn’t pay, he gives his life story, starting with robbing a grocery warehouse and selling the produce on the street. That robbery includes killing the grocery store owner (who Slim worked for), which proves rather crucial later in Slim’s tale.

Then we get a recounting of Slim’s rise to power. Whenever he finds someone in his way, he just knocks them off and keeps knocking them off until he’s a-number one. Commissioner Dolan, the Mayor, and the Spirit are the only people he

can't bribe or kill.

When the Spirit finally comes knocking, looking for evidence to lock up Slim, everything starts going wrong. Not for the reader, who gets the treat of Spirit taking out Slim's entire office of thugs in a beautifully rendered sequence. This strip's got a bit too much of the dotty inks (with some very nice line work, too), but that page where the Spirit two-fists his way through the gangsters is sublime.

Minus some occasional Spirit observations, the strip sticks with Slim. We don't follow the Spirit chasing him, but Slim running from the Spirit. He finds himself in an utterly contrived situation, and it convinces him he should've just stayed straight and not become a crook.

After Slim finishes telling his story, the postscript drives home the "crime doesn't pay" message, just in case any readers missed it the other three times.

It's a decent enough strip. The didacticism isn't a surprise (or even particularly cloying) and the way Eisner constructs the narrative, the various reveals work well enough.

The dotty inking hurts some pages worse than others, but never enough to drag it down.

**Spirit's** found a very reasonable minimum level. Even when the story's a little simple, there's always enough creativity in the art—if not the narrative—to keep things running well enough.

## "CHRISTMAS SPIRIT OF 1940: BLACK HENRY AND SIMPLE SIMON"

December 22, 1940

Will Eisner (editor, script, pencils, inks)  
Joe Kubert (colors)  
Sam Rosen (letters)

For Christmas, the strip does a story without the Spirit. He shows up in the bookends; at the beginning—with some lovely art—Spirit and Ebony discuss Christmas plans. Ebony had been expecting Spirit to go after some known crooks, but instead, Spirit's going to leave it up to the "Spirit of Christmas."

The action cuts to those known crooks, who've decided to rob a bank. It's Christmas Eve, people are busy, and the bank's just gotten a ten thousand dollar deposit (from the Spirit, actually); perfect night for a heist.

It's a good strip. Lots of dotty inking but not too severe. Little cloying but it's Christmas, after all. It's the time of miracles. And spirits.

# “THE LEADER”

December 29, 1940

Will Eisner (editor, script, pencils, inks)

Joe Kubert (colors)

Sam Rosen (letters)

The Spirit gets his first mission as a special government agent: identifying enemy powers' fuel depots on the Mexican coastline. The military doesn't want to let the Mexican government know about it because then they'd want to investigate and they don't want to investigate themselves because gunboats will scare off the other bad guys. So they send the Spirit, who meticulously plots his jump point from the military plane, but fails to expect armed sentries.

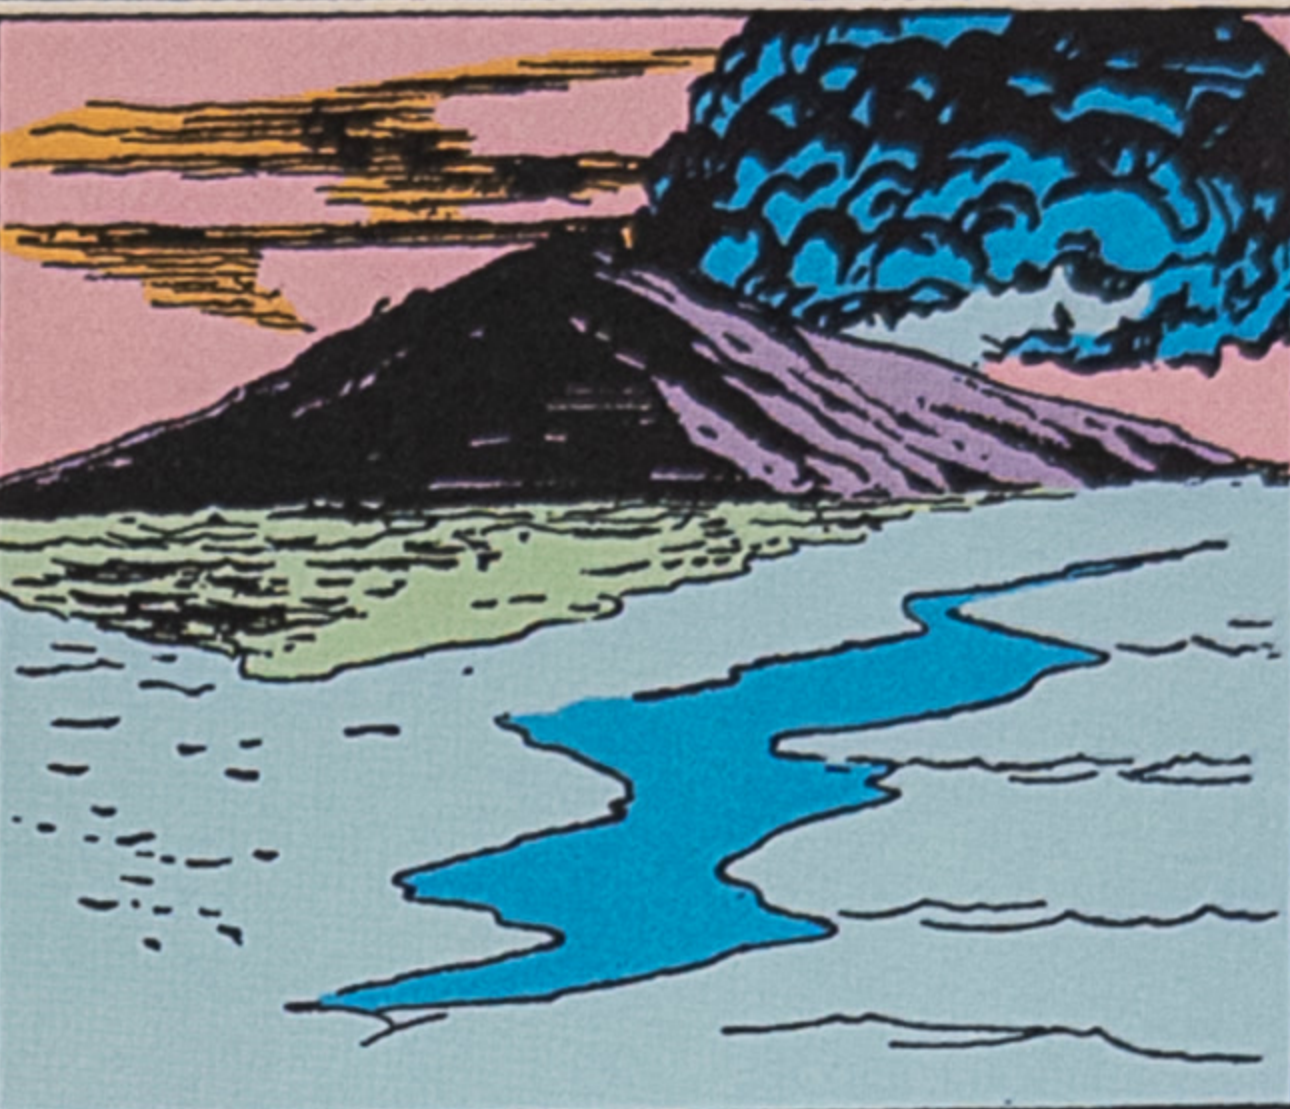

WITH AN IMPROVISED FIRE-BOW, THE SPIRIT BUILDS A BRIGHT BLAZE

USING LONG, POWERFUL STROKES, THE SPIRIT SWIMS OUT OF RANGE...

A SUDDEN RUMBLE... AND THE ENTIRE FAKE ISLAND BURSTS INTO FLAME...GIANT POOLS OF BURNING OIL FLOAT ON THE WATER.....

A WALL OF FIRE SURROUNDS THE ISLAND AS FRANTIC MEN SEEK IN VAIN TO LAUNCH SMALL BOATS.

ON ONE SIDE OF THE ISLAND, NOT YET REACHED BY THE FLOATING FLAMES, A MAD MOB TRIES TO BOARD A TINY SAILBOAT... IN THE STRUGGLE THEY KEEP EACH OTHER FROM GETTING ABOARD.....

IN THE CENTER OF THE MILLING MASS, FORGOTTEN BY HIS FRANTIC COMRADES, THE LEADER SCREAMS IN TERROR....

SUDDENLY THE LEADER'S TEACHINGS COME TO HIS MIND.. Might is Right.. YES.. HE WAS A FOOL NOT TO FOLLOW HIS OWN TEACHINGS....

FROM BEHIND COMES NARGOFF WITH A SUB-MACHINE GUN, MOWING DOWN HIS MEN... HE SOON REACHES THE BOAT AND CLIMBS ABOARD....

CAST OFF, MAX...CAST OFF!! THE ISLAND IS GOING UNDER!! @!!!@!!@\*! KEEP OFF, YOU DOGS!

By this time in the war, Italy had joined on the Axis side. Eisner and studio had plenty of possible ways to go with the enemy forces. They went with “Nargoff,” which is neither German nor Italian. According to the Internet, it’s either Norwegian or Jewish. And Germany had been occupying Norway for months at this point. Maybe he’s Norwegian; Nargoff, the enemy leader.

He’s also an author, who’s written a book about world politics with gems about larger countries having the right by size to take smaller ones. Spirit helps Nargoff understand that system on a personal level later in the strip.

First, Spirit’s got to disrupt the submarine fueling station, which he’s able to do rather conveniently because it’s made out of wood—and wood burns.

The strip goes through three distinct sets of stakes in its eight pages. The Spirit’s got to investigate and resolve the possible fueling station. Then the stakes move to Nargoff having to survive that resolution. And then there’s Nargoff having to survive, well, the Spirit.

When the Spirit’s adversaries die, they rarely do so with the Spirit directly involved. In many cases, he may not even be present. And he generally turns the crooks in alive. So despite the lively, colorful art—lots of blues—and the energy to the action, the strip’s third act is dark. The Spirit’s solution for the situation is just a little unexpected given his... amiable vibe.

But, it’s not wrong about how you deal with fascists.

The strip’s got lumps and bumps; also, some rather solid moments. Spirit’s first mission as agent could’ve gone a lot worse.
